INTRODUCTION

A bit of historic background to the website. The original modern website was built by Ashley in 2017 and was very simple as requested by Greg at the time. It was not interactive and served more like a virtual business card for TIN. As the needs of the business evolved, the website evolved to have an online store, directory and the ability to sell tickets to events (rather than on a third party platform). As the original website plan did not provide a framework for all of the added functionality, it became a bit Frankenstein and thus needed to be rebuilt. This finally happened in 2023. Ashley, who had been with the business 7 years, and Sarah, who had been with the business 5 years, though through every angle they could imagine as to how the website needed to function to meet the digital needs of the business, but also what could be simplified/ automated as to take less time, freeing up the different teams (mainly the digital team) to spend less time on website maintenance, updates, etc, and more time on the myriad of tasks that need to be completed.

Basically the entirety of the new website is automated based on what you input from the Wordpress Dashboard, rather than you having to create/design pages and posts. This is driven by custom post types, advanced custom fields PRO, loopers, and layouts.

There were a few big discussions along the way, so I thought I would lay out some of the reasoning behind the decision that were made here, as I'm sure these questions will come up again.

1. Why is the shop built using Gravity Forms rather than Woocommerce? There are several reasons (and this was a big conversation we had with the sales team).
 - a. Woocommerce is a robust plugin with lots of other (paid!) little plugins that are needed to achieve the full functionality that TIN needs. Woocommerce, and each Woocommerce add-on plugin represented a security vulnerability and load on the website. We were trying to minimize the number of plugins on the site as much as possible to keep the website as stable as possible. Less plugins equals less potential compatibility problems.
 - b. The added cost of the different Woocommerce add-on plugins added up throughout the year and ended up being more expensive than Gravity Forms, which we already needed and paid for.

- c. With PRO (the theme), Woocommerce could never be updated to the most up to date version, only up to the most recent one that had been tested for compatibility with the theme. This presented issues frequently.
 - d. End users on the TIN website very rarely, if ever, purchase more than one item at a time. (The only instances that we saw of this were people putting all of the free reports in their cart and checking out.) As such, at the time of the new website build, there was no need for a cart functionality on the website.
 - e. In conclusion, we opted to use gravity forms rather than woocommerce because 1) we didn't need a cart 2) to save money and 3) having less plugins and not having to run version behind, makes the website more stable
2. Since the launch of the new website there have been a lot of brute force attacks to the login page. The current security protocols are 1) [Flywheel security protocols](#), 2) [Wordfence](#) (free version at the time of writing this manual). With Wordfence we have a firewall, malware scanner, brute force protection, 2FA, reCAPTCHA, and other protocols in place. Wordfence does NOT recommend hiding the login page as they say it is similar to "locking your front door and putting the key under the mat", believing if your other security protocols are up to scratch, this isn't needed. [Find out more here.](#)
 3. We currently do not use a transactional email service. Historically, on Report launch days, we have had instances where the emails being sent from the website have gone down as we have reached our limit of sending emails with Flywheel. We contact them immediately, and historically they have turned our emails back on instantly. We should be using a transactional email service. A lot of research went into this when the website was launched, but the decision was made to wait, purely for financial reasons. Should we implement a transactional email service, it made most sense to use [Postmark](#) as it is owned by Active Campaign and syncs seamlessly with Active Campaign. This would enable us to see at a glance all of the emails received by an end user, rather than having to login to multiple platforms. It would also allow us to setup automations based off of the transactional emails if needed.

Lastly, I apologise for any typos. I did not have time to proof read this document before my last day. If you have any questions or run into any issues you are unable to solve, please don't hesitate to reach out to me.

Good luck!

Ashley

IMPORTANT INFORMATION

VERY IMPORTANT THINGS TO REMEMBER / WARNINGS

The TIN website has been redesigned to require as little input as possible in an effort to save time and man hours so that the digital team has more time to complete the myriad of other tasks on their plate. As such, the website has been built using [custom post types](#), [custom fields](#), [layouts](#), and [loopers](#) so that the majority of the site pages will auto generate based on the information provided from the Wordpress Dashboard. We have also aimed to use as few plugins as possible to increase the stability of the website.

Each layout that has been created is used to generate a page that in the past would need to be created from scratch every time. Ie, an event registration page, a report landing page, a member profile, etc. Each of these types of pages have a complex set of scenarios which would require different information to be included or excluded from the page. As such, each [layout](#) has been built to take into account all of the scenarios which we could have foreseen. Therefore, there is a lot of complex loopers and providers, as well as conditional settings that include or exclude certain sections and elements from the final rendered page depending on the information you provide from the Wordpress dashboard. Therefore, if any of the settings on a layout are changed, it could very easily break layout and cause it to no longer render the final pages correctly. It is very difficult to then try and figure out what the original settings and scenarios that were being accommodated to then fix the layout.

Do NOT make any changes to any single or archive LAYOUTS.

The same can be said for the headers, footers, and homepage and navigation components. Each of these items has been setup with a complex set of conditions, and loopers and providers to ensure that the correct information is displayed on the front end of the site.

Unless you 1000% know what you are doing, please do not touch the single layouts, archive layouts, headers, footers, or homepage and navigation components.

SERVICE PROVIDERS

- Theme: Pro by Themeco
- Hosting: Flywheel
- Plugin & theme updates are managed by Flywheel
- DNS Settings: Managed by Lancom
- Domain Names purchased with Domainz
- Flipsnack: where we upload and host the Report ebooks
- SEO Redirects: Flywheel
- Marketing Emails: Active Campaign

- Transactional Emails: currently sent using the website. Technically we should be using a transactional email service, but due to cost have avoided doing so thus far. There are some less expensive options out there, but we determined if we do move to a transaction service, then we should use Postmark, which is owned and integrated with Active Campaign as it would allow us to keep all of our customer data in once place
- Google search console is setup
- Google Analytics is setup using a very basic setup
- Google My Business:
- ReCAPTCHA is setup with Google reCAPTCHA v3

PLUGIN MAP

Plugin updates are managed by Flywheel.

- Custom Post Type UI – used to create the custom post types (TIN Events, TIN Directory, Report Landing Pages, etc.); this drives the automatic creation of the pages and posts on the front end
- Advanced Custom Field Pro – used to create the custom field types you see when you click “add new” on a custom post; this drives the automatic creation of the pages and posts on the front end
- Custom 404 – a Themeco plugin bundled with the theme used to easily create a custom 404 page
- GFChart – this can likely be deleted. Greg wanted to have a custom sales dashboard setup, but we ran out of time. With the quick testing I did, I don't think it would have worked anyway. Themeco now has a native chart creating option. If by 2024 we haven't used this, please delete it.
- Gravity Forms – used to create the contact and order forms on the website
- Gravity Forms Active Campaign Add On – used to integrate GF with AC
- Gravity Forms Coupons Add-on – gives the order forms coupon functionality
- Gravity Forms Stripe Add on- integrates GF with Stripe
- Site Kit by Google – integrates Google Analytics and Search Console with the website easily and provides a dashboard
- Under Construction – a themeco plugin bundled with the theme used to easily put the site into construction mode if you need to do work on the live site that can't be done in staging
- Wordfence security – the security plugin

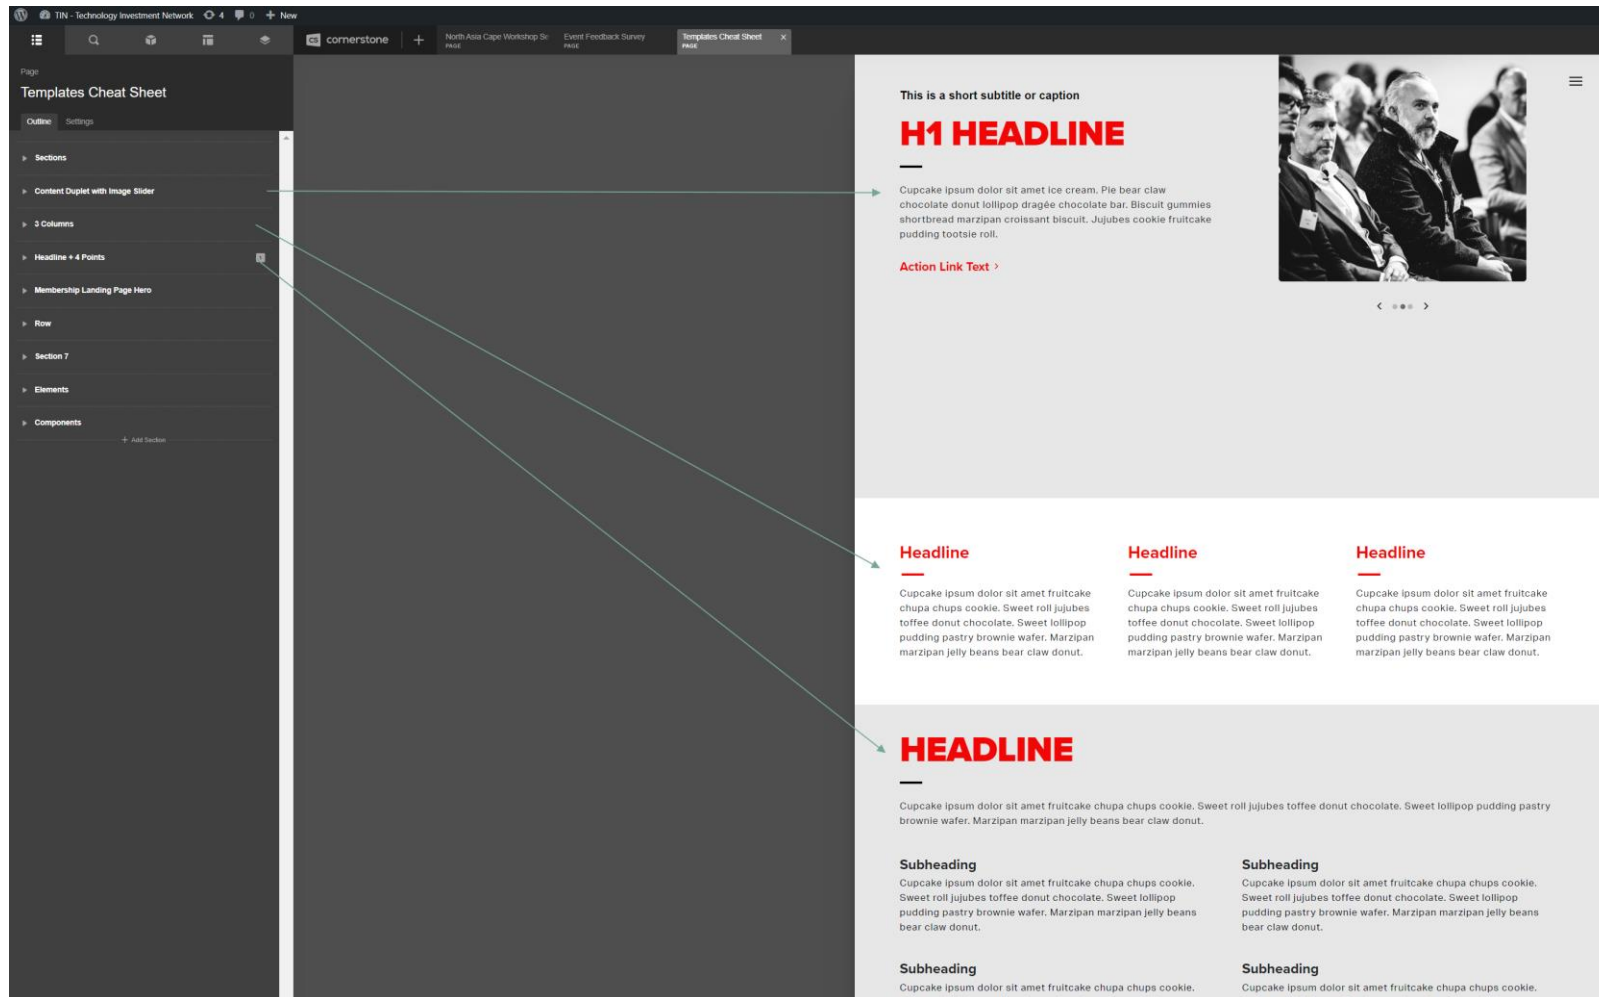

301 REDIRECT

To setup a 301 redirect, which is necessary any time you remove a page from the website or make it a draft (ie, if a company's profile is removed or an event is past), navigate to Flywheel.

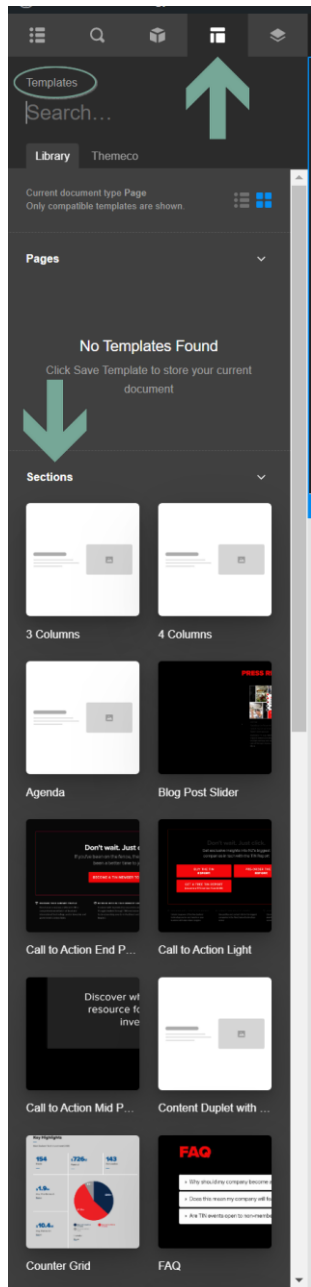

1. Flywheel Dashboard> Advanced>Manage Redirects>Add New
2. Add your [redirect](#) with the removed page/post as the source and the new page that should load as the destination. Note that you can't just copy and paste the URLs; you must use the proper [regex structure](#).
3. If you have any questions, Flywheel support is super helpful. They can double check your work or help to make sure you get the structure correct.

WEBSITE TEMPLATES

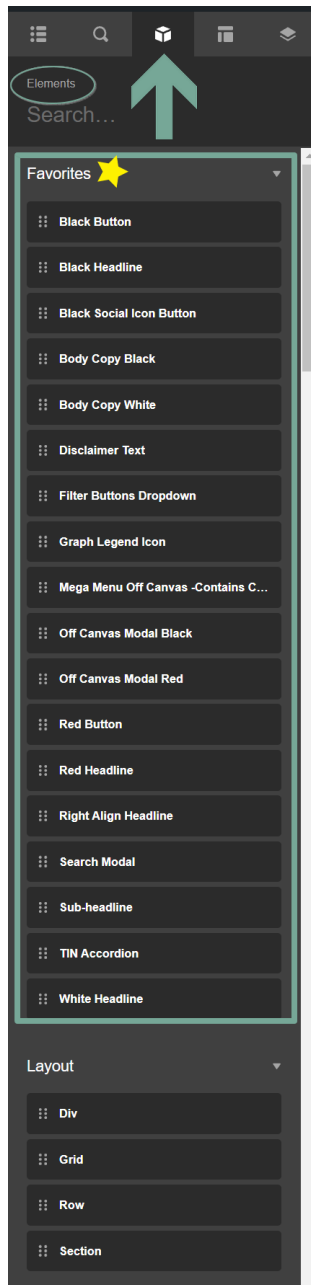

In the off chance a new page needs to be created, or a new section added to a page, a series of templates has been created to ensure consistency in the brand guidelines across the page. You can view all of these templates by looking at the "Templates Cheat Sheet" page in Cornerstone. Do NOT edit anything on this page. It is simply a reference for you to see all of the sections, elements and components that have been created in one spot. There are three different types of templates on the website: sections, elements, and components. Each template is titled in the outline portion of Cornerstone so that when you are building or editing your page, you can search and find the correct template that you are looking for.

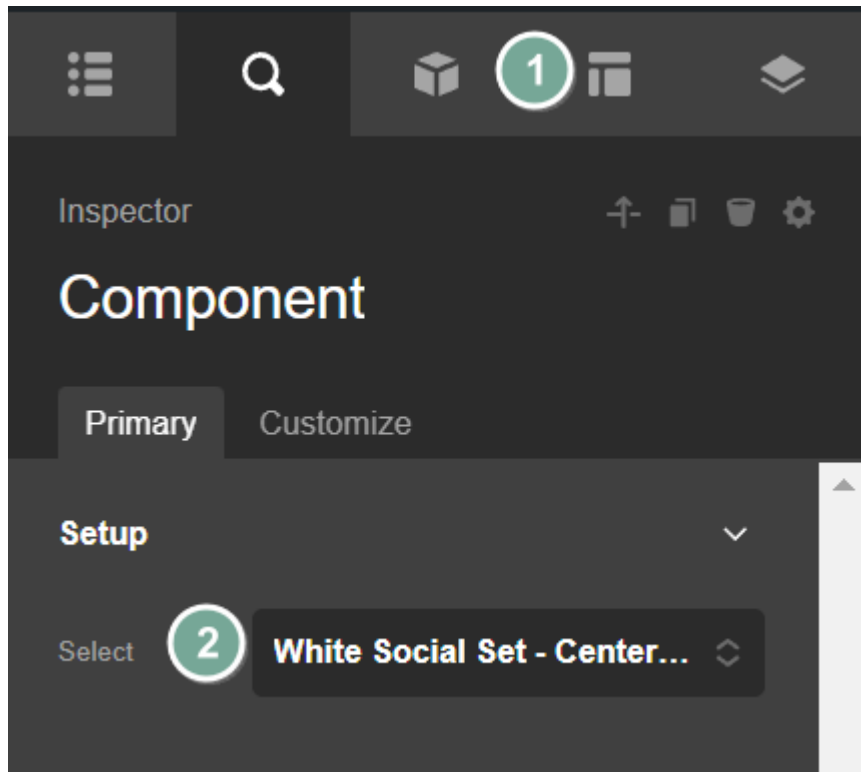

1. Sections: these are standard layouts that were created and used consistently in sections across the website. Each section consists of different combinations of rows, columns, grids, sliders, headlines, body text, buttons, etc.
 - a. To add a section to a page: from the page editor in Cornerstone>Templates>Sections>Add. This will add the section to the bottom of your page. From the outline in Cornerstone, you can drag and drop the section where you need it and update the copy/images as required. Please do not edit the font, font weights, font size, colors (outside of the pre-programmed brand colors), etc.

2. Elements are standard items that get used frequently throughout the website pages. I.e: headlines, body copy, subheadings, buttons, disclaimer text, etc. You can read more about the Elements available in Pro and how to use them, [here](#).
 - a. To add an element: from the page editor in Cornerstone>Elements> drag and drop the element you want, where you want it on the page, or select the + on the element to add it to the bottom of the page.
 - b. A lot of elements come with Pro. All of the elements that have been created, formatted and saved for immediate use for TIN are saved to the "Favorites" section of the element module in Cornerstone.

3. Components are built in the component builder section of cornerstone and can then be dropped into any page using the Component element. This is useful for items that when changed, need to be changed or updated across the entire site. Components have also be used to build complex modules that are embedded on the homepage and in the navigation structure. Please do NOT update the homepage and navigation components as it will cause things to break. You can read more about Components, their uses and how to build them, [here](#).
- a. To add a component: from the page editor in Cornerstone>Elements> Component. Once you have the component on the page where you want it, you can select which component you want to appear from the “select” drop down menu.

ANNUAL UPDATES

The below items need to be updated annually:

1. Media Page
2. Event list subscription in gravity forms
3. Report Landing Pages
4. Navigation Menu & Landing Page Updates
5. Sponsors to update who appears in footer
6. TINTech Directory Member Annual Report Rankings & Awards

MEDIA PAGE

This needs to be done a week or so prior to the TIN Report Launch as media access this information before the launch.

REPORT MOCKUP DOWNLOAD FILE:

1. Create a compressed .zip file of the updated TIN Report mockups. Be sure to include .jpg and .png files of both the hardcopy and ebook versions. I also like to include a .eps file that includes both mockups at a large size so that media teams can size the image correctly for their use case.
2. Upload this file to the media library. Wordpress Dashboard > Media > Add New. Copy the URL
3. Wordpress Dashboard > Cornerstone> Launch> Edit Media Page> Downloads Section
4. Click on Report Mockups button and scroll to the "Link" section in the Inspector
5. Replace the current URL with the updated URL for the .zip file you just uploaded
6. Scroll down to the "Graphic Image" section in the Inspector
7. Click on the source image and update to the product image for the soon to be launched TIN Report
8. SAVE

FAQS, IF REQUIRED

The media FAQs have been written generally so that they do not need an annual update. If the award categories change, this will need to be updated. To update, add, delete FAQs:

1. Wordpress Dashboard > Cornerstone> Launch> Edit Media Page> About TIN Section

2. Do NOT change anything in the “Accordion -FAQ” settings. To update an individual FAQ, click on it in the preview portion of your screen and then you can update the question (header) and answer (content) from the Inspector.
3. If you need to add or delete an FAQ, from the Page Outline in the Inspector:
 - a. To add a new FAQ, click the duplicate icon next to an existing FAQ. Click on it in the preview portion of your screen and then you can update the question (header) and answer (content) from the Inspector.
 - b. To delete a FAQ: from the page outline in the Inspector, click the delete icon next to the FAQ you no longer need.

The screenshot shows the Cornerstone CMS interface for editing a 'Media' page. The left sidebar, titled 'Page Outline', lists the page structure: Hero, About TIN, Row, and Accordion - FAQ. The 'Accordion - FAQ' section is expanded, showing a list of FAQ items. The main preview area displays the 'ABOUT TIN' page content, including a headline, a paragraph about TIN, a section titled 'What is Technology Investment Network (TIN)?', and a list of FAQ items. The interface includes a top navigation bar with various page and component tabs.

Page Outline (Left Sidebar):

ABOUT TIN

Technology Investment Network (TIN) is a private company with a simple mission: to help facilitate the growth of the technology sector in New Zealand. The TIN Team delivers on this objective through research and analysis, curating high-calibre technology networking events throughout NZ, and through the TIN Membership community.

What is Technology Investment Network (TIN)?

Established in 1999, Technology Investment Network (TIN) is a private company dedicated to facilitating the growth of the technology export sector in New Zealand. With a mission to contribute to the country's economy by supporting the development of large, sustainable, New Zealand-based global technology businesses, TIN has become the leading independent source of information on the country's technology sector.

Led by tech entrepreneur Greg Shanahan, TIN has been actively involved in monitoring and empowering NZ's technology exporters for 24 years. Through networking events, valuable resources like the TIN Report, New Zealand Investment Report, subsector reports, and customized research initiatives, TIN is committed to fostering the growth of the technology sector in New Zealand.

- What is the TIN Report?
- What is TIN Membership?
- What awards does TIN present each year at the annual TIN Report Launch?
- What are the key terms and definitions associated with TIN?

Once a year, before the first event of the year, the Active Campaign event list needs to be updated in Gravity Forms. This is done to reduce the number of unsubscribes from the master event list, "Receive info on TIN Events"

1. Create a new LIST in Active Campaign titled Event – YEAR (ie. Event – 2024)
2. Update the Gravity Form Template, "TEMPLATE: Event Registration Form" by navigating to the form>Settings>Active Campaign.
 - a. Edit each of the 10 Attendee Feeds so that they subscribe to the correct year list (ie, the one you just created); **and**
 - b. Update the tag structure with the correct year (under the "Tags" heading).

The screenshot shows the Gravity Forms interface for the "TEMPLATE: Event Registration Form". The "Settings" tab is active, and the "Active Campaign" sub-tab is selected. The "Active Campaign List" dropdown is set to "Event - 2023", highlighted with a yellow box and a green arrow. The "Map Fields" section shows various form fields mapped to Gravity Forms fields. The "Tags" section at the bottom shows a tag "Event - 2023 - (Event Name:74) - Registered" highlighted with a red box and a green arrow.

3. Update the Gravity Form Template, "TEMPLATE: Event Save the Date Registration of Interest" by navigating to the form>Settings>Active Campaign.
 - a. Edit the "save the date" feed so that they subscribe to the correct year list (ie, the one you just created); **and**

- b. Update the tag structure with the correct year (under the “Tags” heading)

REPORT LANDING PAGES

When a new report is released, a new landing page needs to be created for the new Report and the old landing page needs to be archived and removed. Read the [Report Landing Page section](#) for more information on building the landing page. Read the [Navigation Menu & Landing Page Updates section \(in the Annual Updates section\)](#) to read about updating the navigation links.

NAVIGATION MENU & LANDING PAGE UPDATES

When a Report becomes outdated, by either a new version of it being released, or it's more than two years-ish old, the following needs to occur:

1. the links to the landing pages in the top bar and mega menu need to be updated/ removed,
2. the dated Report needs to be removed from the website or set to draft status
3. a 301 redirect needs to be setup to redirect the old URL to the landing page for the updated Report

UPDATING THE NAVIGATION LINKS

The navigation structure is setup to automatically update based as you create posts. It is created in the header builder using components. You should never need to edit the header in the header builder, and pretty much never need to update the components as they are all automated. [You can read more about this in the Headers & Navigation section of this document.](#)

To update the landing page links in the mega menu and top bar:

1. When a new Report is released, you will need to navigate to the “Navigation Menu” tab of the landing page of the out of date Report and toggle it to “No, this is an old version of this Report, please do NOT include it in the navigation top bar and mega menu”
2. When you create the Report landing page, be sure to set the “Navigation Menu” tab of the landing page to “Yes, this is the most up-to-date version of this Report, please include it in the navigation top bar and mega menu.

[You can read more about this in the Headers & Navigation section of this document.](#)

Report Topic *

Fintech

Report Overview *

Enter the elevator pitch of the Report. This is best adapted from the summarising paragraph of the press release. Be sure to include the key words of the page for SEO purposes. Character limit - 550

NZ's Fintech sector has been one of the fastest growing market sectors in the TIN Report for more than a decade, demonstrated by recent stand-out figures. Its five-year compound annual revenue growth rate is 32%, which is three times the TIN200 five-year average. There were 19 Fintech companies in the TIN200 rankings in 2021 and between them they generated a combined \$1.8 billion in revenue, or 13.1% of the total TIN200 revenue. The sector's growth in 2021 was \$358.7 million; a 25% increase on the previous year.

FAQ

Navigation Menu

New Report Release

Include in Navigation Menus *

☒ Yes, this is the most up-to-date version of this Report, please include it in the navigation top bar and mega menu.
 ☐ No, this is an old version of this Report, please do NOT include it in the navigation top bar and mega menu.

REMOVING THE OLD LANDING PAGE

1. Once a new Report has been released, please set the landing page for the old report to Draft status so that search engines don't register the site for duplicate content.
2. Once that is done, a [301 redirect will need to be setup](#) for the outdated landing page link to redirect to the new landing page. Again, this is for SEO reasons, so that we aren't penalised for 404 errors.

SPONSOR LOGOS IN SITEWIDE FOOTER

For new sponsors who's logo you need to add to the footer, you will need to [create a TINTech Directory profile](#) listing following the steps outlined in the TINTech Directory portion of this guide. For existing sponsors or sponsors you need to remove from the logo footer, you need to navigate to their TINTech Directory profile listing.

To add or remove sponsor logos from the sitewide logo footer:

1. From the sponsor's TINTech Directory Profile listing, scroll to the "Current Sponsor" section. The "Yes, this is a current sponsor. Display logo on website footer" checkbox should be checked if the sponsor's logo should display in the sitewide logo footer. If you no longer want the logo to display, uncheck the box and select "update" to save the new setting.

Current Sponsor

Please check the below box if this company is a current Report sponsor that's logo should be displayed in the website footer.

☒ Yes, this is a current sponsor. Display logo on website footer.

TINTECH DIRECTORY MEMBER ANNUAL REPORT RANKINGS & AWARDS

Each year when the new TIN Report is launched, the TINTech Directory profile for member companies who rank in the TIN200 and/or win an award need to be updated.

UPDATE THE TIN RANKING

1. Navigate to the member profile and select "edit"
2. Scroll to the TIN Ranking section. Remove the last row/ oldest ranking by selecting the minus button and "remove"

3. Add a new row using the "add row" button
4. Hover over the number of the new row you created until the mouse changes to a move icon (a cross made of 4 arrows) and the "drag to reorder" tooltip appears
5. Drag your new row to the top position
6. Enter the current report year and updated TIN 200 Ranks

TIN Ranking

	Year *	TIN 200 Rank *
1	2022	17
2	2021	17
3	2020	19
4	2019	20
5	2018	10

[Add Row](#)

TIN Ranking

	Year *	TIN 200 Rank *
1	2022	17
2	2021	17
3	2020	19
4	2019	20
5		

Click to reorder

[Add Row](#)

TIN Ranking	
Year *	TIN 200 Rank *
1 2023	9
2 2022	17
3 2021	17
4 2020	19
5 2019	20

[Add Row](#)

ADD APPLICABLE AWARDS

1. Wordpress Dashboard > TIN Directory> TIN Awards
2. Enter the correct name of this year's awards using the correct naming convention (YEAR FIRST, spell out Ten rather than 10 companies to watch, make sure hyphens and capitalization is consistent with the Report, etc.). le: 2015 EY Ten Companies to Watch, 2020 Rocket Award Winner, 2021 Absolutelt Supreme Scale-Up. Note, by adding the awards to the category/tag section first, rather than just typing them in on the member profile page, this will ensure that you don't have duplicate awards listed with slight spelling /grammar variations.
3. Once you have added this year's awards, navigate to the TIN Members profiles of companies who have won an award.
4. In the TIN Awards section in the side bar, type the year. The awards you have entered will pop up and you can select the correct award for the member.
5. Click Update

Edit TIN Directory Listing [Add new](#)

BLOG POSTS

The blog post layout has been created to accommodate multiple blog post types and scenarios. You can quickly and easily enter a simple blog post, or create a very detailed post including call to actions, an ad, FAQ, and during TIN Report Launch time, the list of the award winners. In a simplified version, the blog post layout setup is:

- Title
- Featured or Hero Image
- Content Group 1
- Call to Action or Ad
- Content Group 2
- Award Winners
- Content Group 3 (note, this content group is likely only used in a post in which Award Winners are listed, to provide a conclusion and contact details at the end of the post)
- Final Call to Action

Depending on which option you fill in on the back end, you can end up with different layout combinations on the front end. The above, utilising all of the conditional sections would be used for a TIN Report Launch Press Release post. Other examples are:

- TINWire Post
 - Title
 - Featured Image
 - Content Group 1
- TIN Member Spotlight Post – Simple
 - Title
 - Featured or Hero Image
 - Content Group 1 (utilising subheadings and body copy to create a Q&A)
- TIN Member Spotlight Post – Sales Focussed
 - Title
 - Featured or Hero Image
 - Content Group 1 (utilising subheadings and body copy to create a Q&A for first half of content)
 - Ad (for membership)
 - Content Group 2
 - Final Call to Action (to purchase membership)
- Event Recap Post

- Title
- Hero Image
- Content Group 1
- Ad (maybe to see full upcoming calendar of events, or if the TIN Report Launch is bookable, a link to that)
- Content Group 2
- Report Launch Post
 - Title
 - Featured or Hero Image
 - Content Group 1
 - Call to Action (to download the Report)
 - Content Group 2
 - Final Call to Action (to download the Report)

All of that to say, there are a lot of different combinations of features to use to create a blog post that meets your needs. To create a new blog post: from the Wordpress Dashboard> Posts>Add New:

1. Add Title: enter the title of the blog post.
2. If necessary, please tweak the URL (in the sidebar) to optimise for SEO
3. Select the correct category for the blog post.
4. Featured Image Square (required!): This image will be used on the news/blog archive page and on the blog post if a hero image is not set.
5. Hero image (not required): Ideally, a hero image will be used for all blog posts, save a TINWire roundup post, as it is more engaging. This image displays across the top of the blog post. It should be roughly 1500x600.
6. Hero Image Description: Input a description of the image, as required, which will appear below the image.
7. Subheading/H2: As applicable, enter the subheading here to boost SEO. This is especially important for press releases.
8. Content Group 1: this is the first block of content that will display after the blog title and featured image/hero image. You will first be prompted to enter a subheading/h3, followed by body copy, and then you have the option to insert an image. This would create one block of text. By clicking "add row" you can enter another block of subheading/body copy/ image, and so on and so forth. If you are creating a simple blog post, like a text news round up, or a TIN Member Spotlight, you can utilise just this content group, review/test your post, and make it live.
 - a. Subheading /H3 (required): this is the text that appears in red on the front end
 - b. Body Copy (required): enter the body copy here. Use enter to create new paragraphs. This is a WYSIWYG editor. Please do NOT change fonts, font sizes, etc. But feel free to utilise hyperlinks, bold, underline, italic, as needed. (Note: you can also add an image here that you would like to be embedded and wrapped around by the text. Click "Add Media". Once the image appears, double click it to select the alignment and text wrap. Click the pencil/edit button to set the size to thumbnail 300x300px. If you use this feature, please

view/proof it on the front end to make sure the image isn't floating around without text wrapped around it appropriately. To use full width landscape images, use the image option in the content group).

- c. Image (not required)
- d. Image Description (not required)
- e. **Note:** click add row to add another grouping of subheading/body copy/ optional image. Do this until you complete the post. If you plan to utilise the call to action or ad option, only enter the portion of your blog post that you want to appear ABOVE the CTA or Ad. Then select "yes" under the call to action or ad mid-page option. Then you will input the remainder of your blog post that will appear after the CTA/Ad in Content Group 2

9. Do you need a Call to Action or Ad mid-page?

- a. Yes, Call to Action – will input a call to action after Content Group 1 and before Content Group 2
 - i. Call to Action 1 Headline
 - ii. Call to Action 1 Body Copy
 - iii. Call to Action 1 Link - Please enter the URL where this CTA should take the end user.
- b. Yes, Ad – will input an Ad after Content Group 1 and before Content Group 2
 - i. Ad Headline
 - ii. Ad Subheading
 - iii. Ad Body Copy
 - iv. Ad Image
 - v. Ad Button Text – enter the text to appear on the button
 - vi. Ad Button Link - Please enter the link where the end user will land once they click on the button.
- c. No – nothing will appear after Content Group 1

10. Content Group 2: Insert the blog post content here that will appear after the mid-page Call to Action/Ad

- a. Subheading /H3 (required): this is the text that appears in red on the front end
- b. Body Copy (required): enter the body copy here. Use enter to create new paragraphs. This is a WYSIWYG editor. Please do NOT change fonts, font sizes, etc. But feel free to utilise hyperlinks, bold, underline, italic, as needed. (Note: you can also add an image here that you would like to be embedded and wrapped around by the text. Click "Add Media". Once the image appears, double click it to select the alignment and text wrap. Click the pencil/edit button to set the size to thumbnail 300x300px. If you use this feature, please view/proof it on the front end to make sure the image isn't floating around without text wrapped around it appropriately. To use full width landscape images, use the image option in the content group).
- c. Image (not required)
- d. Image Description (not required)

11. TIN Report Release Post – this option is used when you need to include the award winners in a blog post/ press release

- a. No, this post does NOT need to include the award winner – hides the tabs to enter the award winners
- b. Yes, this post needs to include the award winners – enables the tabs to enter the award winners

- i. Award Winner Category 1 - Ten to Watch
 - What is the name of this award?
 - Award description paragraph: this text appears below the award name
 - Award Winners: Please enter the award winners in numerical order from 1-10. **Please be sure to enter 2 CHARACTERS in the award rank field. I.e. 01, 02, 3=, 3=, 05, 06, 07, 08, 09, 10, as this will preserve the spacing.**
- ii. Award Winner Category 2 – Scale Ups
 - What is the name of this award?
 - Award description paragraph: this text appears below the award name
 - Award Winners: Please enter the award winners in numerical order from 1-10. **Please be sure to enter 2 CHARACTERS in the award rank field. I.e. 01, 02, 3=, 3=, 05, 06, 07, 08, 09, 10, as this will preserve the spacing.**
- iii. Award Winner Category 3 – Pipeline/Early Stage
 - What is the name of this award?
 - Award description paragraph: this text appears below the award name
 - Award Winners: **please enter in alphabetical order**
- iv. Award Winner Category 4 – Rocket Award
 - What is the name of this award?
 - Award description paragraph: this text appears below the award name
 - Award Winners: Enter the company name and the number of ranks the company has risen. I.e. if they were ranked 122 last year and are now ranked 90, enter 32 in this field. In the off chance, there is more than one Rocket Award winner, please use the "add row" button to accommodate additional winners, and add appropriate explanatory text to the "Award Description Paragraph" field.

12. Content Group 3: Insert the blog post content here that will appear after the award winners. If this post does not include award winners, you likely won't need to utilise content group 3

- a. Subheading /H3 (required): this is the text that appears in red on the front end
- b. Body Copy (required): enter the body copy here. Use enter to create new paragraphs. This is a WYSIWYG editor. Please do NOT change fonts, font sizes, etc. But feel free to utilise hyperlinks, bold, underline, italic, as needed. (Note: you can also add an image here that you would like to be embedded and wrapped around by the text. Click "Add Media". Once the image appears, double click it to select the alignment and text wrap. Click the pencil/edit button to set the size to thumbnail 300x300px. If you use this feature, please view/proof it on the front end to make sure the image isn't floating around without text wrapped around it appropriately. To use full width landscape images, use the image option in the content group).
- c. Image (not required)
- d. Image Description (not required)

13. Do you need a call to action at the end of the page? - Please select yes to include a CTA at the end of the blog post. It is recommended to use this section to sell Reports, event tickets, membership, etc, as it relates to the associated blog post.

- a. Call to Action 2 Headline
- b. Call to Action 2 Body Copy
- c. Call to Action 2 Button Link: Please enter the URL where this CTA should take the end user.
- d. Call to Action 2 Button Text: the text that appears on the button
- e. Call to Action 2 Button Sub text: the smaller text that can appear below the main text on the button. Useful to include starting price information.

UPLOADING A REPORT TO FLIPSNACK

Flipsnack is the ebook service we use to give electronic access to TIN's reports. In the past, only TIN Reports were listed on Flipsnack and were password protected. You were only able to access the ebook, and not download a PDF of the TIN Report. Secondary reports, free and paid, were distributed to end users as a pdf, and not as ebooks.

Moving forward with the new website, ALL TIN's reports, TIN Reports and Secondary Reports (free and paid), will be distributed via ebooks on Flipsnack that are password protected. For secondary reports, NOT the annual TIN Report, the pdf download option within Flipsnack will be turned on.

The reason for this change is 1) to ensure brand consistency for Report access 2) to require a password to view all Reports (for paid reports, to ensure we've received payment; for free reports, to ensure the end user has subscribed to receive emails from TIN in exchange for access to the free report).

Note that we are currently on the business plan on Flipsnack, so that we can access the password protection feature.

Uploading a final report to Flipsnack will generally be the last thing you do when setting up a new Report, as you will not have access to the final report pdf until go live. You can do ALL of the steps to setup a new Report without the Flipsnack link, and just leave the access link and password spaces blank until you have the link. Once you have the link, add it to the correct spaces, do one last test, and go live. Places to update the report access link and password are:

1. Report Order Form - Gravity Form Email Notification – (note for the TIN Report, this only goes in the ebook invoice, not the hard copy only invoice)
2. Membership Order Form – Gravity Form Email Notification – each year when the new TIN Report is released, this link and password needs to be updated to the latest TIN Report
3. The Active Campaign Report Order Dissemination Email

HOW TO UPLOAD A REPORT TO FLIPSNACK

1. Login to [Flipsnack](#) – username: ashley.hibbard@tinetwork.com
2. Click "Upload PDF". Wait patiently. Once it's finished uploading, click "Next." Wait patiently for all of the pages to import and convert. It's a long and complex document, so takes a few minutes.
3. Ensure all of the correct settings for a cohesive brand experience:
 - a. Appearance:
 - i. Appearance: Modern
 - ii. Layout style: Smart View
 - iii. Tooltip language: English
 - iv. Checkboxes, select following: Flip sounds; shadow on pages; highlights on links; auto-detect links. (auto-flip pages and right to left orientation should be left UN-checked).
 - b. Branding:
 - i. Add your logo should be checked, and you should already see the logo in the top left of the screen. If you don't, click the "upload logo" button and select the logo that has already been uploaded to Flipsnack as it is already formatted correctly.
 - ii. Add a link to your logo: link to the website homepage
 - iii. Background color: solid colors. Note the darkest grey (almost black) should be selected already.

- c. Menu Controls (check the following boxes):
 - i. Navigation bar
 - ii. Pages Overview
 - iii. Allow Fullscreen
 - iv. Download PDF – **only check this box for secondary reports, NOT for the annual TIN Report.**
 - v. Search
 - vi. Table of contents: by default this is unchecked and gives you a message stating that Flipsnack as either detected, or NOT detected a table of contents in your document. If the message indicates they have detected a table of contents, simply check the box. If the message indicates they have NOT detected a table of contents, you need to push back to Mosha (or whoever is doing the graphic design of the Report) and request that they send you an updated version of the pdf that has an interactive table of contents. Ashley to trouble shoot the steps of doing this so we can provide them to Mosha when they push back.
 - d. Google Analytics – ashley to complete setup notes later
 - e. Google Tag Manager- ashley to complete setup notes later
 - f. Preserve Settings – do not check this box unless you make a change differing from the settings outlined above that you want to apply to all Reports moving forward
- 4. Click the “Share Now” button at the top right of the screen. A pop up will appear; fill in the information and click “publish”
 - a. Title: the title of the Report (ie. 2022 New Zealand Agritech Insights Report; 2029 TIN Report, 2025 Investor’s Guide to the New Zealand Technology Sector; etc.)
 - b. Description: enter a unique, keyword rich, description of the Report (ie, don't copy and paste the same description from last year's Report; this is penalised by search engines).
 - c. Visibility: Password Locked; generate and enter a password. I like to use [Last Pass](#) to generate secure passwords. Once you copy the password from the generator, paste it into the password box, and also paste it into a message to your self or onto a word document.
- 5. Once published, copy and save the “Link to fullscreen mode on Flipsnack without Flipsnack branding” and password to the [TIN Report Ebook Links document in Sharepoint](#). (Please put the report into the correct chronological order and make sure the formatting is consistent).
- 6. Check the “Show publication on my profile” option
- 7. Check the “Show publish date” option
- 8. Update the report access link (with the link that opens the ebook in full screen mode without Flipsnack branding) and password in the report dissemination emails:
 - a. The Gravity Form Email Notification – (note for the TIN Report, this only goes in the ebook invoice, not the hard copy only invoice)
 - b. The Active Campaign Report Order Dissemination Email
 - c. Any other emails you have setup to distribute the Report (ie, and early bird purchase dissemination emails, etc.)

The screenshot displays the Flipsnack web interface. On the left is a dark sidebar with navigation options: Flipbooks, Read, Embed, Statistics, Send Email, Download GIF, and Download QR Code. The main content area is titled 'Details of 2022 New Zealand Agritech Insights Report' and includes a subtitle 'Access share, embed and download options, as well as statistics'. Below this is a 'Share link' section with a URL input field and a 'Copy' button. The 'Details' section on the left lists metadata: Created on Feb 07, 2023; Published on Feb 07, 2023 (highlighted in yellow with a green arrow pointing to the 'Preview' section); Created by Technology Investme...; Last update on Feb 07, 2023; Visibility Locked; and Workflow tag Untagged. A 'Download' section offers various formats: PDF for web, PDF for print, JPG, PNG, GIF, MP4, and HTML5. The 'Preview' section on the right shows a black background with a white overlay that reads 'The flipbook is password protected' and 'Enter the password to view the flipbook', with a password input field and an 'Unlock' button. At the bottom of the preview area are links for 'View live', 'Edit', 'Customize', 'Upload files', 'Edit link name', and 'SEO'. The top right of the interface features 'Upload PDF', 'Create', and 'TIN' buttons.

- When you are editing a Flipbook, you can manually add links (ie, link the entire membership page to the membership landing page on the website). Go to the page you want to add a link to. Then click “link” in the Flipsnack sidebar. Make the blue box that pops up the size of your page and add your hyperlink in the given URL box. Choose, open in new tab.

TIN
MEMBERSHIP

Technology Investment Network has two distinct membership offerings, one for New Zealand technology companies, and for affiliated businesses that support them.

Benefits include access to bespoke reports, exclusive networking opportunities, discounts on TIN events and publications, and introductions to investor networks.

INCREASED PROFILE
Be recognised as part of a highly influential international network of New Zealand technology export leaders, through featuring in TINWire and the online TINTech directory.

MEANINGFUL INSIGHTS
Enhance your company's performance with insights from New Zealand's leading source of information on the technology sector.

EXCLUSIVE NETWORKING
Regularly connect with industry and investor experts, and with other technology export executives, to exchange ideas and key learnings.

794 x 1115 px

- You can view statistics for a Report by clicking on the three vertical dots next to a report and choosing "Stats."

The screenshot shows the Flipsnack dashboard interface. On the left, there's a sidebar with 'Flipbooks' and 'Read' sections. The main area displays a list of flipbooks under the 'Technology In...' category. The flipbooks listed are:

- 2022 New Zealand Agritech Insights Report (Created: February 07, 2023)
- 2022 New Zealand Healthtech Insights Report (Created: February 03, 2023)
- 2022 TIN Report** (Created: November 21, 2022) - This item is highlighted with a blue selection bar.
- 2021 TIN Report - Preview (Created: November 04, 2021)
- 2020 TIN Report (Created: November 17, 2020)
- 2018 TIN Report (Created: September 28, 2020)

A context menu is open for the '2022 TIN Report', showing options: Edit, Upload files, Make a copy, Rename, Labels, Sharing options, Embed, Download, **Stats** (highlighted with a green arrow and a '2' badge), Analytics, Move to workspace, and Move to trash. The 'Stats' option is the target of the setup process described in the text.

SETTING UP A NEW TIN REPORT

OVERVIEW

SETUP PROCESS OVERVIEW:

1. Setup order form (Dashboard > Forms > Duplicate & Update "TEMPLATE: TIN Report Order"; establish Stripe & Active Campaign feeds for the form; update order notifications)
2. Setup Report purchase page (Dashboard > TIN Reports & Membership > Add New)
3. Setup coupon if applicable (Dashboard > Forms > Coupons)

4. Create Active Campaign automations to disseminate ebook purchase details
5. Test Active Campaign tags & automations are working correctly

END USER EXPERIENCE OVERVIEW

- End user lands on the purchase page & clicks “buy now” button
- Off canvas modal opens, revealing simplified order form where end user makes purchase
- End user receives two emails: 1) tax invoice distributed from website 2) report dissemination from Active Campaign (only sent for an ebook or bundle purchase)
- If selected, end user is opted into receive TIN updates moving forward

FUNCTIONAL / STRUCTURAL OVERVIEW

- The Report purchase page is automatically created using a predefined layout, auto populating the information input to the “TIN Reports & Membership” custom post type using Advanced Custom Fields Pro
- The order form is created using a Gravity form integrated with Stripe and Active Campaign
- The customer invoice/ receipt is issued using the notification options within the Gravity form. There are two invoice notifications setup, one for hardcopy only purchase, and one for ebook and bundle purchases that includes the access link and password.
- If the payment is not successful, the form will not submit and the end user receives an error message on the form/off canvas modal from Stripe indicating the issue (declined, insufficient funds, incorrect CVV, etc)
- Once the form is successfully submitted, tags are added to the contact in Active Campaign utilising merge tags which are dynamically generated based on the naming convention of the Report purchase page and the report purchase selection
- Automations created in Active Campaign will trigger based on the tags
 - Automation 1: Subscribe to master list – if the end user opts in on the order form, Gravity Forms will pass the tag *Email Marketing Opt In - TIN Report Order Form* to Active Campaign which will enter them into the Automation: *Opts into Marketing When Making a Purchase > Subscribe to Master List* (the completion of this automation triggers the automation: *Subscribes to Master List > Subscribe to TINWire, Free/Paid Report, Events Lists* which subscribes the user to our distribution lists).
 - Automation 2: Distribute TIN Report Ebook– Upon successful payment and form submission, the contact will be automatically tagged with a tag created utilising merge fields. IMPORTANT NOTE: The tags are automatically created from the website order form using the page and product titles you create. It is imperative that you stick to the correct naming conventions for the tags and automations to

work correctly and end users to receive their report access. The dynamically created tag merge tag formula is this: Purchased-{embed_post:post_title}-{Report Purchase Selection:7}. (This equates to Purchased-Post Title-Report Purchase Selection with post title = the title of the post you created in this section from Wordpress Dashboard > TIN Reports & Membership > Add New > the text input in the first box on the screen above the "Report Information" section. Report Purchase Selection = the purchase selection made on the order form by the end user. As an FYI, this is in Forms>Edit Form>Report Purchase Selection>Edit Choices. You should not edit these names/labels ever, only, if the TIN Report pricing structure changes, should you adjust the pricing options here.) The final tag would read something like: Purchased-2022 TIN Report-Single User Ebook

CREATING THE ORDER FORM:

DO NOT EDIT THIS FORM! Please copy the form and rename it to correspond to the new report (ie: 2029 TIN Report Order). Note, that I would recommend putting the year first in the report title and keeping names/titles consistent, so that it's easy to search and view entries.

IMPORTANT: This form uses merge tags based off of the report page you create. It is imperative that you name the report page correctly, which is to use the report title, date first. If this is incorrect, the end user will see incorrect information and the reporting will be incorrect.

Step-by-step instructions are as follows:

DUPLICATE & UPDATE THE NEW ORDER FORM

1. Create new form by Wordpress Dashboard> Forms> searching TEMPLATE: TIN Report Order and clicking "duplicate." **DO NOT MAKE CHANGES IN THE TEMPLATE**
2. Make note of the form ID for the new order form you just created (see yellow highlight in below screenshot)
3. Update the form name by clicking Edit in your newly duplicated form> Settings >Form Settings. Rename the "form title" field with the correct TIN Report year details. For example: 2022 TIN Report Order; 2025 TIN Report Order; etc. Scroll to bottom and click "Save Settings"

Form Title (Required) ?

TEMPLATE: TIN Report Order Form

Form Description ?

Note, if you need the complete Shortcode for the order form, you can find it by going to Wordpress Dashboard > Forms > Edit (on the form you need it for) > Embed button (in the top right corner of the screen) > Copy Shortcode button (at bottom of pop up). In order to have the form display correctly, some code has been added to the Shortcode that is put into the "order form shortcode" field on the Report Purchase page (Wordpress Dashboard> TIN Reports & Membership > Add New). The Shortcode should read [gravityform id="XXXXXX" title="false" description="false" ajax="true"], with XXXXX being replaced by the corresponding order form ID.

Note, if the TIN Report pricing structure changes, you can update the pricing from Edit Form>Report Purchase Selection> Edit Choices. Here you can enter the updated pricing INCLUDING GST. **Note, do NOT change the names/labels as these are used to automatically create tags which are used by Active Campaign to send the email containing purchased report access.**

The screenshot shows the Cornerstone Forms editor for a form titled "2022 TIN Report Order". The form is divided into several sections:

- Contact Information:** Includes fields for First Name, Last Name, Email Address, and Phone Number.
- Report Purchase Selection:** A dropdown menu with the text "Please Select" and a sub-label "including GST".
- Shipping Address:** Includes fields for Street Address and Address Line 2.

A "Choices" panel is open on the right, showing a table of product options. A red "X" is overlaid on the "Label" column, and a green box highlights the "Price" column. The table contains the following data:

Label	Price
User Ebook	\$ 516.35
Multi User Ebook	\$ 458.85
Multi User Ebook	\$ 1,148.85
Bundle - Hardcover + Single	\$ 631.35
Bundle - Hardcover + Multi	\$ 1,436.35

The "Report Purchase Selection" field is highlighted with a green box and a red "X". The "Choices" panel also shows options for "Add Bulk Choices" and "Bulk Add / Predefined Choices".

NOTIFICATIONS: UPDATE THE CUSTOMER RECEIPT EMAILS

Three notifications are setup for the order form:

1. Admin order notification: sends an email to orders@tinetwork.com with all of the information from the order form

2. Customer Order Receipt - Hardcopy Only: this has a conditional setting so that if the purchase is for a hard copy, they receive a receipt that includes all of the invoice/GST information, but not the access link to the ebook
3. Customer Order Receipt – Order Includes Ebook: This has a conditional setting so that if the purchase is NOT a hard copy (ie: single user ebook, multi user ebook, single user bundle, multi user bundle). This email includes the invoice/ GST information, and also the access link and password for the ebook.

This is one of two ways the customer receives access to their paid report ebook. It is included here, in the order receipt, and also disseminated via Active Campaign. It is being sent using two methods for two reasons: 1) to ensure a consistent brand experience for the customer – free reports are sent using Active Campaign, and if accustomed to receiving a Report access email that looks a certain way, they may not notice the access information in the invoice/receipt email. 2) as a back up – Active Campaign automations have glitches sometimes and do not work; we want to be 100% sure if the customer is making a purchase, they are receiving access to the Report they purchased.

The only notification you need to make changes to is the Customer Order Receipt – Order Includes Ebook, to add the ebook access link and password. Steps are as follows:

1. Adding ebook access link and password to Customer Order Receipt- Order Includes Ebook email notification: Settings > Notifications > hover on the Customer Order Receipt and click “edit”
2. Scroll to the Message field. Select “Visual” if it has defaulted to HTML/text. Scroll to the rows in the table labelled “Access Link” and “Password”. Paste the correct Flipsnack access link and password, taking care not to paste an extra space at the start or end of the password. Click “Update Notification.” Note, the Flipsnack access link and password are generated when you upload the Report to Flipsnack. Internally, we store that information on the [TIN Report Ebook Links document in Sharepoint](#).

UPDATE THE ACTIVE CAMPAIGN FEEDS

1. Settings> ActiveCampaign > Hover over the existing Report order feed and select "edit"
2. Feed Name: Enter the same name as the order form, ie: 2022 TIN Report Order, 2030 TIN Report Order, etc.
3. Active Campaign List: TIN Report Dissemination – Website Orders
4. Map the fields: see screenshot below. Note, do **NOT** map the "organization name" field. If this is mapped it will update the organisation name/company name to whatever the end user puts when they order a report – for example, they may put Datacom LTD, or Datacom, or Datacom Inc. – this creates problems at TIN Report survey time as you then have multiple variations for company names. So please do NOT map the "organization name" field
5. Tags: **do NOT change the tag structure**. This adds tags to the user in Active Campaign and is used to trigger different automations. If the tags come through incorrectly, the automations won't trigger
6. Click "Save Settings"
7. Settings> ActiveCampaign > Hover over the existing "Email Marketing Opt In" and select "edit"
8. Delete "- Copy 1" in the title and click "Save Settings" No updates are required for this feed

Note: Do NOT change the Active Campaign lists that either feed subscribes the purchaser to. Email Marketing Opt In = Master Contact List // TIN Report Order = TIN Report Dissemination-Website Orders List

The screenshot shows the 'ActiveCampaign Feeds' settings page. At the top, there's a navigation bar with '2022 TIN Report Order' selected, and tabs for 'Edit', 'Entries', and 'Sales'. A 'Preview' button is on the right. On the left sidebar, 'ActiveCampaign' is selected. The main content area shows a table of feeds:

☐	Name	ActiveCampaign List
☐	2022 TIN Report Order	TIN Report Dissemination
☐	Email Marketing Opt In	Master Contact List
☐	Name	ActiveCampaign List

Below the table, there are 'Bulk actions' and 'Apply' buttons. A '3' is circled next to the '2022 TIN Report Order' feed, indicating a step in the process.

UPDATE TIN MEMBERSHIP ORDER FORM EMAIL NOTIFICATION

Once the new TIN Report has been uploaded to Flipsnack, edit the TIN Membership Subscription Form by:

1. Wordpress Dashboard > Forms > Membership Subscription Form > Notifications > Settings > Notifications > Customer Order Receipt-Membership
2. Scroll to the email message (be sure you are on visual, rather than text), replace the old TIN Report ebook access link and password with the access link and password for the latest TIN Report.

Note: This is the same process you used to update the [TIN Report Order Custom Receipt above](#).

SETUP THE TIN REPORT PURCHASE PAGE

PROCESS OVERVIEW

1. Create the Report graphic in photoshop using the designated mock-up and save to correct format
2. Create the TIN Report purchase page

Note the TIN Report Purchase page is a custom post, with the custom post type being "TIN Reports & Membership"

CREATE THE REPORT GRAPHIC

Using the correct Photoshop Report mock-up template, create the new report graphic. Note: there are two templates, 1) [TIN Report Mockup – Landscape](#) (for TIN Reports and older Reports that were landscape) and 2) [Sector Reports Mockup – Portrait](#) (for Sector Reports and anything else that is portrait). Each template houses all of the Report mock-ups dating back to 2014. Once you add a new Report, please save and replace the current mock-up file, in SharePoint, with the updated one housing the addition of the latest Report.

The templates and shop graphics can be found in [Sharepoint> Documents> Digital Media > Website > Report Shop Graphics & Mockups](#). In this folder is [a video showing how to create a Report mock-up](#).

1. Open the mock-up file and the cover of the Report in Photoshop (if the cover is opening and the color is grayscale or looks off, please adjust the "mode" to "RGB Color")
2. In your layers panel, double click "Your Design Here" which will open a new tab in photoshop

3. Switch to the tab where you have opened your cover design and drag and drop the design into the new "Your Cover Design Here" tab. Resize the image to the same size as the canvas. Rename the layer to the correct report name. Close the "Your Cover Design Here" tab and when prompted, click yes save.
4. Export the mock-up to a .jpg that is optimised for web. It should be a 1:1 ratio, square image, 800x800px and less than 200kb. Upload that image to the "[Report Shop Graphics – Final](#)" folder in Sharepoint. You will use this image to create the Report purchase page, as well as for the Active Campaign dissemination email that will send the Report, and likely in lots of other places. Note, if you need to export the image with a transparent background for use in other graphics, you will need to export it as a .png and possibly export it to a different aspect ratio.
5. Save the updated mock up file and replace the one currently in Sharepoint so that Sharepoint houses the most up to date file containing all of the Report mockups.

SETUP THE REPORT SPONSORS

This is a two step process: 1) add the report as a category in the TINTech Directory "Report Sponsorship" section 2) tag the sponsors TINTech Directory profile with the new report. NB. If it is a new sponsor, you will need to [create a new TINTech Directory listing](#) following the steps outlined in the TINTech Directory section of this document.

1. To add the report as a category in the TINTech Directory "Report Sponsorship" section:
 - a. Wordpress Dashboard> TIN Directory> Report Sponsorship
 - b. Add new tag of the new Report. Be sure to use the correct naming convention. YEAR Report Name Sponsor
2. Navigate to the sponsor's profile in the TINTech Directory. If this is a new sponsor, you will need to [create a new TINTech Directory listing](#) following the steps outlined in the TINTech Directory section of this document.
 - a. In the sidebar section of the Directory Profile page, navigate to the Report Sponsorship section. Enter the year of the Report that you are setting up and you will see the options pop up. Select the correct report and click Update.

Sponsor

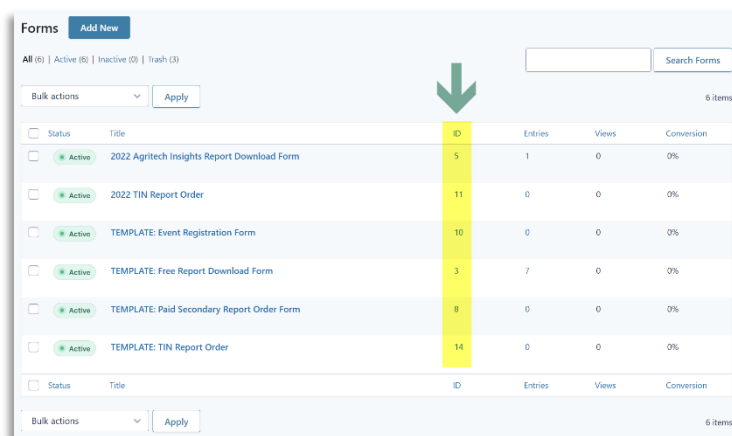

Choose from the most used Company Type

CREATE THE REPORT PURCHASE PAGE

Note the Report purchase page is created using the custom post type *TIN Reports & Membership*.

1. Create the new Report purchase page by navigating to the Wordpress Dashboard > TIN Reports & Membership > Add New
2. Enter the Report Details
 - a. Most important: in the "Add TIN Report" box at the top of the page, type the name of the TIN Report using the correct naming convention (ie. 2022 TIN Report, 2004 TIN Report, 2030 TIN Report, etc.). This field is used to auto populate countless pieces on the website and within Active Campaign. It is imperative that it is correct and consistent.
 - b. Report name: copy and paste from above

- c. Report description: this displays on the purchase page, but is very important for SEO purposes. It is important that this field uses different copy than past Reports and search engines penalise duplicate content (in the past, for time saving purposes we have used the same text, but that has changed with the website rebuild). This text should be concise, but keyword rich for things we would like to rank for and that are relevant to the Report.
- d. Report Graphic: upload the 1:1 ratio, square graphic that you have just created. Note that it should be a .jpg, 800x800px and less than 200kb. If it is larger than this, the website will stop you from uploading it. Note that once the page is saved, this will auto update the "Featured Image" in the sidebar.
- e. Report Sponsors: tag the correct Report sponsors here. Note, you will not be able to add any sponsors who have not already been added to the TINTech Directory. It is important to enter the correct sponsors here as it auto populates several areas of the website.
- f. Product Type: Select TIN Report – this is used to dynamically create various sections of the website and auto update it with the most recent Reports and links to the corresponding purchase pages. Note that once the page is saved, this will auto update the "Product Types" tag box in the sidebar.
- g. Upsells: Please select Membership and the last three (or at least one) relevant paid Reports (ie: current Secondary Reports or the most recent TIN Report / Secondary Reports). Note that we only want to enter paid reports here as we do not want to divert and end user from purchasing a TIN Report to downloading a free Report.
- h. Order Form Shortcode: This is the Shortcode for the Gravity Form that will embed in the off canvas modal that opens on the purchase page when you click the "buy now" button. Update the XXXXXXXX with the form ID of the order form. You can find this from the Wordpress Dashboard > Forms > ID. Just replace the XXXX's in between the quotation marks with the correct numerical id; for example: [gravityform id="11" title="false" description="false" ajax="true"]. Note: do not change any other attributes of the Shortcode (title, ajax, etc.).

The screenshot shows the Gravity Forms dashboard with a table of active forms. A green arrow points to the ID column of the first form, '2022 Agritech Insights Report Download Form', which has ID 5.

Status	Title	ID	Entries	Views	Conversion
Active	2022 Agritech Insights Report Download Form	5	1	0	0%
Active	2022 TIN Report Order	11	0	0	0%
Active	TEMPLATE: Event Registration Form	10	0	0	0%
Active	TEMPLATE: Free Report Download Form	3	7	0	0%
Active	TEMPLATE: Paid Secondary Report Order Form	8	0	0	0%
Active	TEMPLATE: TIN Report Order	14	0	0	0%

- i. Report Pricing Structure: Select TIN Report – this will drop down the option to enter the TIN Report prices excluding GST which will display on the purchase page
- j. Coupon Code Details: If this Report is currently on sale, please refer to the [Pricing, Coupons & Sales section](#) on how to set this up
- k. Once Complete, click Save Draft. Then preview and test the page to make sure that it is all working as it should be.

PRICING, COUPONS & SALES

SETTING UP A COUPON

Create the coupon by navigating Wordpress Dashboard> Forms> Coupons>Add New > Select the appropriate form for the coupon to apply to (ie: the TIN Report that is on sale). Click Save Settings

1. Fill in the coupon details and click Save Settings.
 - a) Coupon name (ie: 2022 TIN Report Early Bird Coupon)
 - b) Coupon Code: the code the end user will enter to receive the discount
 - c) Coupon Amount: you can choose either flat rate or percentage discounts. Note that whatever you put here will apply across the board to all report purchase types (hardcopy, ebook, bundle, etc.). (In the pervious website setup, we had the ability to have more complex coupons but found we were too time poor to manage them properly and have tried to simplify everything for the new website build).
 - d) Coupon Start and End Dates: the dates the coupon code is valid for
 - e) Usage limit: the total number of times the coupon can be used (not per user, but across the board). This will most likely be left blank
 - f) Is stackable: the coupon can be used in conjunction with other coupons. This feature generally won't be used.

Applies to Which Form?

Gravity Form ? 

2022 TIN Report Order

2022-07-01

End Date ? 

2022-10-31

Usage Limit ? 

Is Stackable ? 

☐ Is Stackable

Save Settings → 

2. Distribute the coupon code.

- a) You can provide it in emails, social posts, etc,
- b) If it is a blanket promotion you want everyone to have access to, ie an Early Bird special or something of that sort, you need to add the coupon code to the Report purchase page.
 - i. Wordpress Dashboard > TIN Reports & Membership > Edit the page of the Report the promotion is for

Coupon Code Details

Is this report on sale?

☒ Yes, this report is on sale

Discount Type *

☒ %

☐ \$

Coupon Code *

If this product is on sale, please create a coupon code in gravity forms and paste the code here. It will then display on the product page for end users to use in the checkout process.

EARLYBIRD22

Coupon Code Text *

Please enter the numeric value assigned to your coupon code. ie: 25%, enter 25; \$10 off, enter 10.

Save 25 on your Report

- ii. Scroll to the bottom of the page and select "Yes, this report is on sale". Fill in the required fields indicating the discount type, the coupon code and the numeric value associated with your discount. (Ie: 10 for \$10 off, or 25 for 25% off.) The discount type and number entered here is used to auto populate the text on the purchase page and will read either *Save XX% on your Report* or *Save \$XX on your Report* depending on how these fields are entered here.

Important Note: By selecting "yes this report is on sale" three things happen on the front end: 1) an on sale badge appears on the report image, 2) the sale promo text appears on the Report purchase page; and 3) the sale promo text appears on the off canvas modal just below the submit button on the order form. **Once the promotion has ended you have to return to the Report purchase page setup and unselect the checkbox indicating that the Report is currently on sale.** This will remove the three items above. (Wordpress Dashboard > TIN Reports & Membership > Edit the appropriate Report page > scroll to the bottom and deselect the "yes, this Report is on sale" check box). Also note that you can only display one coupon code on the TIN Report purchase page, even if you have multiple codes running at the same time. If this is required, contact Ashley.

ADJUSTING TIN REPORT PRICING

To adjust the pricing for the TIN Report, you need to adjust 1) the price displayed on the purchase page; and 2) the price displayed and charged on the order form. Note that if you adjust the pricing rather than using a coupon code, the "on sale" bade does not display. If this is required, contact Ashley.

1. Adjust the price range displayed on the purchase page by navigating to Wordpress Dashboard > TIN Reports & Membership > Select edit under the appropriate Report > Update the prices, **excluding** GST

The annual TIN Report is a unique quantitative study of New Zealand's leading internationally-focused technology businesses in the areas of Hi-tech Manufacturing, ICT and Biotechnology. It provides a valuable reference for industry stakeholders within both the private sector and the government.

Become a member today to receive your TIN Report and secondary reports at no added cost, savings on our full calendar of events, and much more.

Save 25% on your 2022 TIN Report. Use COUPON CODE: **EARLYBIRD22** at checkout.

BUY NOW

2. Adjust the price displayed and charged on the order form by navigating to the Wordpress Dashboard > Forms > Select Edit under the appropriate order form. Select the "Report Purchase Selection" section > Edit Choices > Update the prices, **including** GST. Note that the amount entered here is what will be charged via Stripe. If there is an error here, the end user will be charged the incorrect amount. Also note, do not adjust the report names/ label section. These are used to dynamically create the tags that drive the Active Campaign automations.

Important Note: If this is not a permanent price change, when the pricing returns to normal, you need to update the pricing in both the Report purchase page and the Report order form as outlined in steps 1 and 2 above.

SETTING UP ACTIVE CAMPAIGN TIN REPORT PURCHASE AUTOMATIONS

PROCESS OVERVIEW

1. Duplicate existing *Website Order Report Dissemination Email* automation
2. Update the name & trigger tags
3. Using an existing template, create the email
4. Test! Test! Test!

CREATE REPORT ORDER DISSEMINATION AUTOMATION & EMAIL

1. Find and duplicate/copy an existing *Website Order Report Dissemination Email Automation* > Edit Automation (be sure to duplicate one that is a TIN Report, not a paid secondary report)
2. Update Automation Name with correct report name (ie: Website Order Dissemination – 2023 TIN Report)
3. Update all four triggers to correct tags. The easiest way to do this is to simply edit the trigger and change the year. This will automatically create the tags. The correct naming conventions need to have been used for the TIN Report product page (ie: Wordpress Dashboard > TIN Reports & Membership > Add New > ____).
- a) IMPORTANT NOTE: The tags are automatically created from the website order form using the page and product titles you create. It is imperative that you stick to the correct naming conventions for the tags and automations to work correctly and end users to receive their report access. The dynamically created tag merge tag formula is this: Purchased-{embed_post:post_title}-{Report Purchase Selection:7}. This equates to Purchased-Post Title-Report Purchase Selection with post title = the title of the post you created in this section from Wordpress Dashboard > TIN Reports & Membership > Add New > the text input in the first box on the screen above the "Report Information" section. Report Purchase Selection = the purchase selection made on the order form by the end user. As an FYI, this is in Forms>Edit Form>Report Purchase Selection>Edit Choices. You should not edit these names/labels ever, only, if the TIN Report pricing structure changes, should you adjust the pricing options here. **A final tag will read Purchased-2021 TIN Report-Single User Ebook; Purchased-2022 TIN Report-Bundle - Hardcopy + Multi User Ebook; Purchased-2022 TIN Report-Hardcopy.**

Action option (Tag is added)

Tag: Purchased-2021 TIN R

Runs: Multiple Times

ADVANCED

☐ Segment the contacts entering this automation

Back Save Start

4. Create new Report Dissemination Email

- a) Click on the email, select Create New Email. Note that you have to create a new email otherwise you will be sending the details to another year's report.

Select email to send

2022 TIN Report Dissemination - Website Order Edit

or [Create a New Email](#)

☒ Send Immediately

☐ Send with Predictive Sending ⚠️
Utilises machine learning to send emails when a contact is most likely to open them. [Learn more](#)

Cancel Save

- b) Name your email (ie: 2021 TIN Report Dissemination Email - Website Orders) and click Start with Past Campaign. In the pop up, click continue and then it will let you select which past campaign you would like to use as your template
- c) Select a past TIN Report email campaign and update the necessary fields, notably:
- Email Subject Line (ie: Access to the 2021 TIN Report)
 - The Report name in the opening line of the email

- iii. Ebook link
 - iv. Ebook password
 - v. Report Graphic
 - vi. Sponsor logo lock up
 - vii. Pre header text
- d) Proof read the email to make sure it all makes sense and update or remove any text from a previous campaign that is no longer valid.

TEST THE TIN REPORT PURCHASE PAGE

From sarah: do we have to test in staging environment? Stripe in test mode. Maybe copy to staging, test and then make live without pushing staging to live environment.

Do not publish the TIN Report purchase page until you have tested that everything is working as it should be.

1. Clone the live environment to the staging environment in Flywheel. **Need steps on how to do this.**
2. In the **staging environment**, switch Stripe to test mode: Wordpress Dashboard > Forms>Settings> Stripe> Test> Save Settings. **Do NOT do this in the live environment**. If anyone tries to place an order, it will not go through and they will get their purchase for free. (Note that it may prompt you to re-enter the Test Signing Secret Key and Live Signing Secret key which you can get from Stripe.)

3. Preview or make the Report product page live (Note you are still in the staging environment).

4. Test! Test! Test! Use the [Stripe test credit cards](#) to make sure all purchases process correctly. Different things you need to test and check are as follows:
 - a. View the product page – are all of the details correct? If on sale, is the sale badge showing/sale verbiage showing on the page and on the off-canvas modal? Did you tag the sponsors correctly? Does clicking on the sponsor logos link you to their Directory listings? Do the upsells display and link correctly?
 - b. Purchase each option of Report to ensure the correct emails are sent out. I.e. Hard copy sends tax invoice with no ebook access details. All other options send two emails, one tax invoice and one triggered from the Active Campaign automation.
 - c. Did the tags work as expected? Did they appear in Active Campaign? Did they appear correctly? Did they trigger the correct automations?
 - d. Does the coupon work as expected?
 - e. Is the access link and password correct in both emails?
 - f. Are the linked images in the emails connecting correctly (TIN logo, social media icons, etc.).
 - g. Try a few purchases with declined test credit cards to make sure that they do not trigger the emails and the correct error messages are displayed.
5. Once testing is complete you can either 1) switch Stripe back to live mode and then in Flywheel, push the staging site to the live environment (if you made any changes in the staging site), or 2) in the live environment, publish the Report product page (if you did not make any changes).

Important Note: When you push the staging site to the live environment, it will override the live environment, therefore, if any orders were made while you were testing in the staging site, those orders would be lost. Be conscious of this, and if there have been orders since you cloned the site, make your final changes directly in the live site (or clone a new copy of the live site to the staging environment and then make your changes and push them live before any more orders come through).

SETTING UP A PAID SECONDARY REPORT

Setting up a paid secondary report is very similar to setting up a TIN Report, save you don't have multiple purchase options (ie. Hardcopy, Ebook, bundles, etc.)

OVERVIEW

SETUP PROCESS OVERVIEW:

1. Setup order form (Dashboard > Forms > Duplicate & Update "TEMPLATE: Paid Secondary Report"; establish Stripe & Active Campaign feeds for the form; update order notifications
2. Setup Report purchase page (Dashboard > TIN Reports & Membership > Add New)
3. Setup coupon if applicable (Dashboard > Forms > Coupons)
4. Create Active Campaign automations to disseminate ebook purchase details
5. Test Active Campaign tags & automations are working correctly

END USER EXPERIENCE OVERVIEW

- End user lands on the purchase page & clicks "buy now" button
- Off canvas modal opens, revealing simplified order form where end user makes purchase
- End user receives two emails: 1) tax invoice distributed from website 2) report dissemination from Active Campaign
- If selected, end user is opted into receive TIN updates moving forward

FUNCTIONAL / STRUCTURAL OVERVIEW

- The Report purchase page is automatically created using a predefined layout, auto populating the information input to the "TIN Reports & Membership" custom post type using Advanced Custom Fields Pro
- The order form is created using a Gravity form integrated with Stripe and Active Campaign
- The customer invoice/ receipt is issued using the notification options within the Gravity form, and includes the access link and password.
- If the payment is not successful, the form will not submit and the end user receives an error message on the form/off canvas modal from Stripe indicating the issue (declined, insufficient funds, incorrect CVV, etc)
- Once the form is successfully submitted, tags are added to the contact in Active Campaign utilising merge tags which are dynamically generated based on the naming convention of the Report purchase page
- Automations created in Active Campaign will trigger based on the tags
 - Automation 1: Subscribe to master list – if the end user opts in on the order form, Gravity Forms will pass the tag *Email Marketing Opt In - TIN Report Order Form* to Active Campaign which will enter them into the Automation: *Opts into Marketing When Making a Purchase* >

Subscribe to Master List (the completion of this automation triggers the automation: *Subscribes to Master List > Subscribe to TINWire, Free/Paid Report, Events Lists* which subscribes the user to our distribution lists).

- o Automation 2: Distribute Paid Secondary Report Ebook– Upon successful payment and form submission, the contact will be automatically tagged with a tag created utilising merge fields. IMPORTANT NOTE: The tags are automatically created from the website order form using the page and product titles you create. It is imperative that you stick to the correct naming conventions for the tags and automations to work correctly and end users to receive their report access. The dynamically created tag merge tag formula is this: Purchased-{embed_post:post_title}. (This equates to Purchased-Post Title, with post title = the title of the post you created in this section from Wordpress Dashboard > TIN Reports & Membership > Add New > the text input in the first box on the screen above the “Report Information” section. The final tag would read something like: Purchased-2022 Healthtech Insights Report

CREATING THE ORDER FORM

DO NOT EDIT THIS FORM! Please copy the form and rename it to correspond to the new report (ie: 2029 TIN Healthtech Insights Report Order). Note, that I would recommend putting the year first in the report title and keeping names/titles consistent, so that it's easy to search and view entries.

IMPORTANT: This form uses merge tags based off of the report page you create. It is imperative that you name the report page correctly, which is to use the report title, date first. If this is incorrect, the end user will see incorrect information and the reporting will be incorrect.

Step-by-step instructions are as follows:

DUPLICATE & UPDATE THE NEW ORDER FORM

4. Create new form by Wordpress Dashboard> Forms> searching TEMPLATE: Paid Secondary Report Order and clicking “duplicate.” **DO NOT MAKE CHANGES IN THE TEMPLATE**
5. Make note of the form ID for the new order form you just created (see yellow highlight in below screenshot)
6. Update the form name by clicking Edit in your newly duplicated form> Settings >Form Settings. Rename the “form title” field with the correct TIN Report year details. For example 2022 New Zealand Healthtech Insights Report Order; etc. Scroll to bottom and click “Save Settings”
7. Adjust the Report price & name: From your form, click Edit. Once the form is open, click “Report Price” Update the field label with the Report name. Update the Price field with the correct price, INCLUDING GST. The amount entered here, is what will be charged. Click Save Form.

Form Basics

Form Title (Required) ?

TEMPLATE: Paid Secondary Report (1)

Form Description ?

Note, if you need the complete Shortcode for the order form, you can find it by going to Wordpress Dashboard > Forms > Edit (on the form you need it for)> </> Embed button (in the top right corner of the screen) > Copy Shortcode button (at bottom of pop up). In order to have the form display correctly, some code has been added to the Shortcode that is put into the “order form shortcode” field on the Report Purchase page (Wordpress Dashboard> TIN Reports & Membership > Add New). The Shortcode should read [gravityform id="XXXXXX" title="false" description="false" ajax="true"], with XXXXXX being replaced by the corresponding order form ID.

NOTIFICATIONS: UPDATE THE CUSTOMER RECEIPT EMAILS

Three notifications are setup for the order form:

4. Admin order notification: sends an email to orders@tinetwork.com with all of the information from the order form
5. Customer Order Receipt: This email includes the invoice/ GST information, and also the access link and password for the ebook.

This is one of two ways the customer receives access to their paid report ebook. It is included here, in the order receipt, and also disseminated via Active Campaign. It is being sent using two methods for two reasons: 1) to ensure a consistent brand experience for the customer – free reports are sent using Active Campaign, and if accustomed to receiving a Report access email that looks a certain way, they may not notice the access information in the invoice/receipt email. 2) as a back up – Active Campaign automations have glitches sometimes and do not work; we want to be 100% sure if the customer is making a purchase, they are receiving access to the Report they purchased.

How to update the Customer Order Receipt:

3. Adding ebook access link and password to Customer Order Receipt- Paid Secondary Report email notification: Settings > Notifications > hover on the Customer Order Receipt and click “edit”
4. Scroll to the Message field. Select “Visual” if it has defaulted to HTML/text. Scroll to the rows in the table labelled “Access Link” and “Password”. Paste the correct Flipsnack access link and password, taking care not to paste an extra space at the start or end of the password. Click “Update Notification.” Note, the Flipsnack access link and password are generated when you upload the Report to Flipsnack. Internally, we store that information on the [TIN Report Ebook Links document in Sharepoint](#).

UPDATE THE ACTIVE CAMPAIGN FEEDS

- Settings> ActiveCampaign > Hover over the existing Report order feed and select "edit"
- Feed Name: Enter the same name as the order form, ie: 2022 Healthtech Insights Report Order, etc.
- Active Campaign List: TIN Report Dissemination – Website Orders
- Map the fields: see screenshot below. Note, do NOT map the "organization name" field. If this is mapped it will update the organisation name/company name to whatever the end user puts when they order a report – for example, they may put Datacom LTD, or Datacom, or Datacom Inc. – this creates problems at TIN Report survey time as you then have multiple variations for company names. So please do NOT map the "organization name" field
- Tags: **do NOT change the tag structure**. This adds tags to the user in Active Campaign and is used to trigger different automations. If the tags come through incorrectly, the automations won't trigger
- Click "Save Settings"
- Settings> ActiveCampaign > Hover over the existing "Email Marketing Opt In" and select "edit"
- Delete "- Copy 1" in the title and click "Save Settings" No updates are required for this feed

Note: Do NOT change the Active Campaign lists that either feed subscribes the purchaser to. Email Marketing Opt In = Master Contact List // TIN Report Order = TIN Report Dissemination-Website Orders List

SETUP THE PAID SECONDARY REPORT PURCHASE PAGE

PROCESS OVERVIEW

1. Create the Report graphic in photoshop using the designated mock-up and save to correct format
2. Create the Paid Secondary Report purchase page

Note the Paid Secondary Report Purchase page is a custom post, with the custom post type being "TIN Reports & Membership"

CREATE THE REPORT GRAPHIC

Follow the instructions for creating a TIN Report shop graphic. Note that if the Paid Secondary Report is a portrait report, rather than landscape, please use the portrait report mock up.

SETUP THE REPORT SPONSORS

This is a two step process: 1) add the report as a category in the TINTech Directory "Report Sponsorship" section 2) tag the sponsors TINTech Directory profile with the new report. NB. If it is a new sponsor, you will need to [create a new TINTech Directory listing](#) following the steps outlined in the TINTech Directory section of this document.

1. To add the report as a category in the TINTech Directory "Report Sponsorship" section:
 - a. Wordpress Dashboard> TIN Directory> Report Sponsorship
 - b. Add new tag of the new Report. Be sure to use the correct naming convention. YEAR Report Name Sponsor
2. Navigate to the sponsor's profile in the TINTech Directory. If this is a new sponsor, you will need to [create a new TINTech Directory listing](#) following the steps outlined in the TINTech Directory section of this document.
 - a. In the sidebar section of the Directory Profile page, navigate to the Report Sponsorship section. Enter the year of the Report that you are setting up and you will see the options pop up. Select the correct report and click Update.

Edit TIN Directory Listing [Add new](#)

A LOCAL STORY

We're proud to be 100% New Zealand grown, with a global focus. As a business, we share a common vision of being New Zealand's top technology recruitment company. This means being the best connected, the most knowledgeable and most effective in meeting our clients' and our job seeker's needs—our success comes from your success.

SUPPORTING THE KIWI TECH SECTOR

We have been a passionate contributor to New Zealand's Tech Sector for over 20 years, and we are proud to invest in recurring annual sponsorships. The highlight of our annual partnership with TIN is our sponsorship of the Absolute IT Supreme Scale-Ups award. This accolade celebrates the top ten companies from the

CREATE THE PAID SECONDARY REPORT PURCHASE PAGE

Note the Report purchase page is created using the custom post type *TIN Reports & Membership*.

1. Create the new Report purchase page by navigating to the Wordpress Dashboard > TIN Reports & Membership > Add New
2. Enter the Report Details
 - a. Most important: in the "Add TIN Report" box at the top of the page, type the name of the TIN Report using the correct naming convention (ie. 2022 New Zealand Healthtech Insights Report, 2023 Investor's Guide to the New Zealand Technology Sector, etc.). This field is used to auto populate countless pieces on the website and within Active Campaign. It is imperative that it is correct and consistent.

- b. Report name: copy and paste from above
- c. Report description: this displays on the purchase page, but is very important for SEO purposes. It is important that this field uses different copy than past Reports as search engines penalise duplicate content (in the past, for time saving purposes we have used the same text, but that has changed with the website rebuild). This text should be concise, but keyword rich for things we would like to rank for and that are relevant to the Report.
- d. Report Graphic: upload the 1:1 ratio, square graphic that you have just created. Note that it should be a .jpg, 800x800px and less than 200kb. If it is larger than this, the website will stop you from uploading it. Note that once the page is saved, this will auto update the "Featured Image" in the sidebar.
- e. Report Sponsors: tag the correct Report sponsors here. Note, you will not be able to add any sponsors who have not already been added to the TINTech Directory. It is important to enter the correct sponsors here as it auto populates several areas of the website.
- f. Product Type: Select Paid Secondary Report – this is used to dynamically create various sections of the website and auto update it with the most recent Reports and links to the corresponding purchase pages. Note that once the page is saved, this will auto update the "Product Types" tag box in the sidebar.
- g. Upsells: Please select Membership and the last three (or at least one) relevant paid Reports (ie: current Secondary Reports or the most recent TIN Report / Secondary Reports). Note that we only want to enter paid reports here as we do not want to divert and end user from purchasing a TIN Report to downloading a free Report.
- h. Order Form Shortcode: This is the Shortcode for the Gravity Form that will embed in the off canvas modal that opens on the purchase page when you click the "buy now" button. Update the XXXXXXX with the form ID of the order form. You can find this from the Wordpress Dashboard > Forms > ID. Just replace the XXXX's in between the quotation marks with the correct numerical id; for example: [gravityform id="11" title="false" description="false" ajax="true"]. Note: do not change any other attributes of the Shortcode (title, ajax, etc.).

Forms [Add New](#)

All (6) | Active (6) | Inactive (0) | Trash (3)

Bulk actions 6 items

Status	Title	ID	Entries	Views	Conversion

2022 New Zealand Healthtech Insights Report

Permalink: <https://investor.tin.nz/healthtech-insights-report/2022-new-zealand-healthtech-report/>

Report Information

Report Name *

2022 New Zealand Healthtech Insights Report

Report Description *

The New Zealand Healthtech Insights Report provides a close look at the country's Healthtech export sector based on data from TIN's 2021 survey results, including size and significance, key export markets, investment challenges and opportunities, along with a comprehensive directory of Kiwi pipeline Healthtech companies based in New Zealand.

This report has been prepared by Technology Investment Network (TIN) in collaboration with the Consortium for Medical Device Technologies (CMDT) and would not be possible without support from our sponsors Spark Health, Douglas Pharmaceuticals ASX, Callaghan Innovation, Absolute IT, Orion Health (spending), Fisher & Paykel Healthcare and NZ Growth Capital Partners (NZGCP).

Order your digital copy of the 2022 Healthtech Insights Report today.

Report Graphics *

Please upload a .jpg, max file size 500px x 500px and less than 2000kb.

This field auto-populates the Featured Image section in the sidebar

Report Sponsors *

Sponsors must be input into the Directory before they can be tagged here.

PRICING, COUPONS & SALES

ADJUSTING PAID SECONDARY REPORT PRICING

1. From the Report Purchase page, adjust the "Secondary Report Price" field to the price EXCLUDING GST. This field populate the price you see when you go to the Report Purchase page on the front end of the website.
2. From the Order Form, adjust the "Report Price" field following the [instructions in this section](#), to the price INCLUDING GST. This field is what shows on the order form and is what the end user is charged via Stripe.

Important Note: If this is not a permanent price change, when the pricing returns to normal, you need to update the pricing in both the Report purchase page and the Report order form as outlined in steps 1 and 2 above.

SETTING UP A COUPON

Create the coupon by navigating Wordpress Dashboard> Forms> Coupons>Add New > Select the appropriate form for the coupon to apply to (ie: the Paid Secondary Report that is on sale). Click Save Settings

3. Fill in the coupon details and click Save Settings.
 - a) Coupon name (ie: 2022 TIN Report Early Bird Coupon)
 - b) Coupon Code: the code the end user will enter to receive the discount
 - c) Coupon Amount: you can choose either flat rate or percentage discounts.
 - d) Coupon Start and End Dates: the dates the coupon code is valid for
 - e) Usage limit: the total number of times the coupon can be used (not per user, but across the board). This will most likely be left blank
 - f) Is stackable: the coupon can be used in conjunction with other coupons. This feature generally won't be used.

Applies to Which Form?

Gravity Form ? 

2022 TIN Report Order

4. Distribute the coupon code.

- a) You can provide it in emails, social posts, etc,
- b) If it is a blanket promotion you want everyone to have access to, ie an Early Bird special or something of that sort, you need to add the coupon code to the Report purchase page.
 - i. Wordpress Dashboard > TIN Reports & Membership > Edit the page of the Report the promotion is for

- ii. Scroll to the bottom of the page and select “Yes, this report is on sale”. Fill in the required fields indicating the discount type, the coupon code and the numeric value associated with your discount. (Ie: 10 for \$10 off, or 25 for 25% off.) The discount type and number entered here is used to auto populate the text on the purchase page and will read either *Save XX% on your Report* or *Save \$XX on your Report* depending on how these fields are entered here.

☒ Yes, this report is on sale

Discount Type *
☒ %
☐ \$

Coupon Code *
If this product is on sale, please create a coupon code in gravity forms and paste the code here. It will then display on the product page for end users to use in the checkout process.
EARLYBIRD22

Coupon Code Text *
Please enter the numeric value assigned to your coupon code. ie: 25%, enter 25; \$10 off, enter 10.
Save 25 on your Report

Important Note: By selecting “yes this report is on sale” three things happen on the front end: 1) an on sale badge appears on the report image, 2) the sale promo text appears on the Report purchase page; and 3) the sale promo text appears on the off canvas modal just below the submit button on the order form. **Once the promotion has ended you have to return to the Report purchase page setup and unselect the checkbox indicating that the Report is currently on sale.** This will remove the three items above. (Wordpress Dashboard > TIN Reports & Membership > Edit the appropriate Report page > scroll to the bottom and deselect the “yes, this Report is on sale” check box). Also note that you can only display one coupon code on the TIN Report purchase page, even if you have multiple codes running at the same time. If this is required, contact Ashley.

SETTING UP ACTIVE CAMPAIGN REPORT PURCHASE AUTOMATIONS

PROCESS OVERVIEW

1. Duplicate existing *Website Order Report Dissemination Email* automation
2. Update the name & trigger tags
3. Using an existing template, create the email

CREATE PAID SECONDARY REPORT ORDER DISSEMINATION AUTOMATION & EMAIL

1. Find and duplicate/copy an existing *Website Order Report Dissemination Email Automation* > Edit Automation (be sure to duplicate one that is a Paid Secondary Report, not a TIN Report)
2. Update Automation Name with correct report name (ie: Website Order Dissemination – 2022 Healthtech Insights Report)
3. Update the trigger to the correct tag. The easiest way to do this is to simply edit the trigger and change the report name (report name=the name input on the Report purchase page in the first entry field on the top of the page). This will automatically create the tags. The correct naming conventions need to have been used for the report product page (ie: Wordpress Dashboard > TIN Reports & Membership > Add New > ____).
 - a. IMPORTANT NOTE: The tags are automatically created from the website order form using the page and product titles you create. It is imperative that you stick to the correct naming conventions for the tags and automations to work correctly and end users to receive their report access. The dynamically created tag merge tag formula is this: Purchased-{embed_post;post_title}. This equates to Purchased-Post Title, with post title = the title of the post you created [in this section](#) from Wordpress Dashboard > TIN Reports & Membership > Add New > the text input in the first box on the screen [above](#) the “Report Information” section. **A final tag will read Purchased-2022 Healthtech Insights Report.**

Save Start

4. Create new Report Dissemination Email

- a. Click on the email, select Create New Email. Note that you have to create a new email otherwise you will be sending the details to another year's report
- b. Name your email (ie: 2022 Healthtech Insights Dissemination Email - Website Orders) and click Start with Past Campaign. In the pop up, click continue and then it will let you select which past campaign you would like to use as your template.
- c. Select a past Paid Secondary Report campaign and update the necessary fields, notably:
 - i. Email Subject Line (ie: Access to the 2022 Healthtech Insights Report)
 - ii. The Report name in the opening line of the email
 - iii. Ebook link
 - iv. Ebook password
 - v. Sponsor logo lock up
 - vi. Pre header text
- d. Proof read the email to make sure it all makes sense and update or remove any text from a previous campaign that is no longer valid. Save & Exit

TESTING THE PAID SECONDARY REPORT

Best way to do this?

SETTING UP A FREE SECONDARY REPORT

OVERVIEW

Double check this is all correct once I've actually done it

SETUP PROCESS OVERVIEW:

1. Setup order form. Dashboard > Forms > Duplicate & Update "TEMPLATE: Free Report Download"; establish Active Campaign feed for the form; update order notifications
2. Setup Report download page (Dashboard > TIN Reports & Membership > Add New)
3. Create Active Campaign automation to disseminate ebook access details
4. Test Active Campaign tags & automations are working correctly

END USER EXPERIENCE OVERVIEW

- End user lands on the download page & clicks "free download now" button
- Off canvas modal opens, revealing simplified order form where end user makes enters details & gives consent to subscribe to receive updates in exchange for the free report
- End user receives two emails: 1) report order confirmation distributed from website 2) report dissemination from Active Campaign
- End user is opted into receive TIN updates moving forward

FUNCTIONAL / STRUCTURAL OVERVIEW

- The Report download page is automatically created using a predefined layout, auto populating the information input to the "TIN Reports & Membership" custom post type using Advanced Custom Fields Pro
- The order form is created using a Gravity form integrated with Active Campaign
- The customer order confirmation email is issued using the notification options within the Gravity form, and includes the access link and password.
- Once the form is successfully submitted, tags are added to the contact in Active Campaign utilising merge tags which are dynamically generated based on the naming convention of the Report download page
- Automations created in Active Campaign will trigger based on the tags
 - Automation 1: Subscribe to master list – Gravity Forms will pass the tag *Email Marketing Opt In - TIN Report Order Form* to Active Campaign which will enter them into the Automation: *Opts into Marketing When Making a Purchase > Subscribe to Master List* (the completion of this automation triggers the automation: *Subscribes to Master List > Subscribe to TINWire, Free/Paid Report, Events Lists* which subscribes the user to our distribution lists).
 - Automation 2: Distribute Free Secondary Report Ebook– Upon successful submission of the form, the contact will be automatically tagged with a tag created utilising merge fields. IMPORTANT NOTE: The tags are automatically created from the website order form using the page and product titles you create. It is imperative that you stick to the correct naming conventions for the tags and automations to work correctly and end users to receive their report access. The dynamically created tag merge tag formula is this: `Downloaded-{embed_post:post_title}`. (This equates to Downloaded-Post Title, with post title = the title of the post you created in this section from Wordpress Dashboard > TIN Reports & Membership > Add New > the text input in the first box on the screen above the "Report Information" section. The final tag would read something like: Downloaded-2022 Agritech Insights Report

CREATING THE ORDER FORM

DO NOT EDIT THIS FORM! Please copy the form and rename it to correspond to the new report (ie: 2029 Investor's Guide to the New Zealand Technology Sector). Note, that I would recommend putting the year first in the report title and keeping names/titles consistent, so that it's easy to search and view entries.

IMPORTANT: This form uses merge tags based off of the report page you create. It is imperative that you name the report page correctly, which is to use the report title, date first. If this is incorrect, the end user will see incorrect information and the reporting will be incorrect.

Step-by-step instructions are as follows:

DUPLICATE & UPDATE THE NEW ORDER FORM

1. Create new form by Wordpress Dashboard> Forms> searching TEMPLATE: Free Report Download and clicking “duplicate.” **DO NOT MAKE CHANGES IN THE TEMPLATE**
2. Make note of the form ID for the new order form you just created (see yellow highlight in below screenshot)
3. Update the form name by clicking Edit in your newly duplicated form> Settings >Form Settings. Rename the “form title” field with the correct report name. For example: 2023 Investor's Guide to the New Zealand Technology Sector Free Report Download; 2025 Agritech Insights Report; etc. Scroll to bottom and click “Save Settings”

The screenshot shows the Gravity Forms dashboard in a WordPress environment. The left sidebar contains navigation links for Dashboard, Pro, Cornerstone, Posts, Portfolio, Media, Forms (with a notification badge), Pages, Comments, TIN Directory, TIN Events, TIN Reports & Membership, Appearance, Plugins (with a notification badge), Users, and Tools. The main content area is titled 'Forms' and includes an 'Add New' button. Below this, there's a filter bar showing 'All (10) | Active (10) | Inactive (0) | Trash (7)'. A search bar contains the text 'templated' with a green arrow pointing to it. A table lists the forms with columns for Status, Title, ID, Entries, Views, and Conversion. The 'ID' column is highlighted in yellow. The form 'TEMPLATE: Free Report Download' has an ID of 3 and 8 entries. A yellow circle highlights the 'Duplicate' link for this form.

Status	Title	ID	Entries	Views	Conversion

Form Basics

Form Title (Required) ?

2022 Agritech Insights Report Download

Form Description ?

Note, if you need the complete Shortcode for the download form, you can find it by going to Wordpress Dashboard > Forms > Edit (on the form you need it for) > Embed button (in the top right corner of the screen) > Copy Shortcode button (at bottom of pop up). In order to have the form display correctly, some code has been added to the Shortcode that is put into the "order form shortcode" field on the Report Purchase page (Wordpress Dashboard> TIN Reports & Membership > Add New). The Shortcode should read [gravityform id="XXXXXX" title="false" description="false" ajax="true"], with XXXXX being replaced by the corresponding order form ID.

NOTIFICATIONS: UPDATE THE CUSTOMER RECEIPT EMAILS

Two notifications are setup for the order form:

1. Admin order notification: sends an email to orders@tinetwork.com with all of the information from the order form
2. Customer Order Email Confirmation – Free Secondary Report: This email includes the access link and password for the ebook.

This is one of two ways the customer receives access to their free report ebook. It is included here, in the order receipt, and also disseminated via Active Campaign. It is being sent using two methods for two reasons: 1) to ensure a consistent brand experience for the customer – paid reports are sent using Active Campaign, and if accustomed to receiving a Report access email that looks a certain way, they may not notice the access information in the free report download notification email. 2) as a back up – Active Campaign automations have glitches sometimes and do not work; we want to be 100% sure if the customer is making a downloading a Report, they are receiving access to it.

The only notification you need to make changes to is the Customer Order Email Confirmation – Free Secondary Report, to add the ebook access link and password. Steps are as follows:

1. Adding ebook access link and password to Customer Order Email Confirmation – Free Secondary Report, email notification: Settings > Notifications > hover on the Customer Order Email Confirmation and click “edit”
2. Scroll to the Message field. Select “Visual” if it has defaulted to HTML/text. Scroll to the rows in the table labelled “Access Link” and “Password”. Paste the correct Flipsnack access link and password, taking care not to paste an extra space at the start or end of the password. Click “Update Notification.” Note, the Flipsnack access link and password are generated when you upload the Report to Flipsnack. Internally, we store that information on the [TIN Report Ebook Links document in Sharepoint](#).

Auto-formatting ?

☐ Disable auto-formatting

UPDATE THE ACTIVE CAMPAIGN FEEDS

1. Settings> ActiveCampaign > Hover over the existing Report order feed and select “edit”
2. Feed Name: Enter the same name as the order form, ie: Free Report Download - 2022 Agritech Insights Report, etc.
3. Active Campaign List: Master Contact List
4. Map the fields: see screenshot below. Note, do NOT map the “organization name” field. If this is mapped it will update the organisation name/company name to whatever the end user puts when they order a report – for example, they may put Datacom LTD, or Datacom, or Datacom Inc. – this creates problems at TIN Report survey time as you then have multiple variations for company names. So please do NOT map the “organization name” field
5. Key: leave this as it is; this field is mapping the “what is your affiliation to the NZ tech sector?” field from the form to the AC field “tech sector affiliation”
6. Tags: **do NOT change the tag structure**. This adds tags to the user in Active Campaign and is used to trigger different automations. If the tags come through incorrectly, the automations won't trigger. Note that two tags will be added when an end user processes this form, 1) indicating that they've downloaded a free report, this will trigger the Active Campaign Report Dissemination Automation/Email; and 2) Email Marketing Opt- In, this will subscribe them to the Master List and therefore all of the other lists.
7. Click “Save Settings”

Note: Do NOT change the Active Campaign lists that the feed subscribes the end user to.

SETUP THE REPORT SPONSORS

This is a two step process: 1) add the report as a category in the TINTech Directory "Report Sponsorship" section 2) tag the sponsors TINTech Directory profile with the new report. NB. If it is a new sponsor, you will need to [create a new TINTech Directory listing](#) following the steps outlined in the TINTech Directory section of this document.

1. To add the report as a category in the TINTech Directory "Report Sponsorship" section:
 - a. Wordpress Dashboard> TIN Directory> Report Sponsorship
 - b. Add new tag of the new Report. Be sure to use the correct naming convention. YEAR Report Name Sponsor
2. Navigate to the sponsor's profile in the TINTech Directory. If this is a new sponsor, you will need to [create a new TINTech Directory listing](#) following the steps outlined in the TINTech Directory section of this document.
 - a. In the sidebar section of the Directory Profile page, navigate to the Report Sponsorship section. Enter the year of the Report that you are setting up and you will see the options pop up. Select the correct report and click Update.

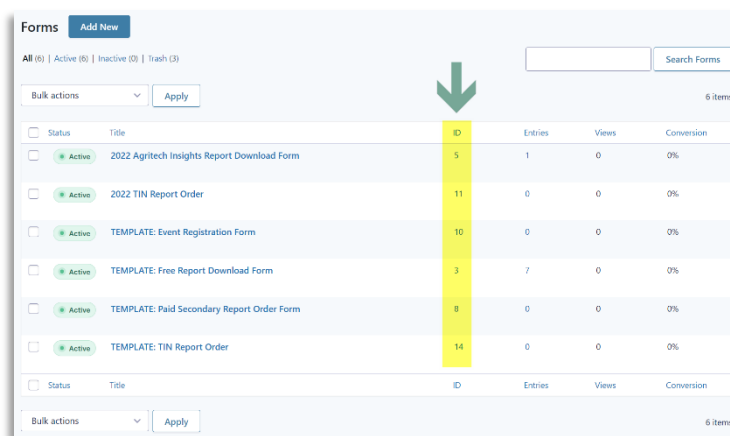

CREATE THE FREE SECONDARY REPORT DOWNLOAD PAGE

Note the Report download page is created using the custom post type *TIN Reports & Membership*.

1. Create the new Report download page by navigating to the Wordpress Dashboard > TIN Reports & Membership > Add New
2. Enter the Report Details
 - a. Most important: in the "Add TIN Report" box at the top of the page, type the name of the Free Secondary Report using the correct naming convention (ie. 2022 New Zealand Agritech Insights Report, 2023 Investor's Guide to the New Zealand Technology Sector, etc.). This field is used to auto populate countless pieces on the website and within Active Campaign. It is imperative that it is correct and consistent.

- b. Report name: copy and paste from above
- c. Report description: this displays on the purchase page, but is very important for SEO purposes. It is important that this field uses different copy than past Reports as search engines penalise duplicate content (in the past, for time saving purposes we have used the same text, but that has changed with the website rebuild). This text should be concise, but keyword rich for things we would like to rank for and that are relevant to the Report.
- d. Report Graphic: upload the 1:1 ratio, square graphic that you have just created. Note that it should be a .jpg, 800x800px and less than 200kb. If it is larger than this, the website will stop you from uploading it. Note that once the page is saved, this will auto update the "Featured Image" in the sidebar. [Follow the instructions here to create the graphic.](#)
- e. Report Sponsors: tag the correct Report sponsors here. Note, you will not be able to add any sponsors who have not already been added to the TINtech Directory. It is important to enter the correct sponsors here as it auto populates several areas of the website.
- f. Product Type: Select Free Secondary Report – this is used to dynamically create various sections of the website and auto update it with the most recent Reports and links to the corresponding purchase pages. Note that once the page is saved, this will auto update the "Product Types" tag box in the sidebar.
- g. Upsells: Please select Membership and the last three (or at least one) relevant paid Reports (ie: current Secondary Reports or the most recent TIN Report / Secondary Reports). Note that we only want to enter paid products here.
- h. Order Form Shortcode: This is the Shortcode for the Gravity Form that will embed in the off canvas modal that opens on the purchase page when you click the "buy now" button. Update the XXXXXXXX with the form ID of the order form. You can find this from the Wordpress Dashboard > Forms > ID. Just replace the XXXX's in between the quotation marks with the correct numerical id; for example: [gravityform id="11" title="false" description="false" ajax="true"]. Note: do not change any other attributes of the Shortcode (title, ajax, etc.).

Status	Title	ID	Entries	Views	Conversion
Active	2022 Agritech Insights Report Download Form	5	1	0	0%
Active	2022 TIN Report Order	11	0	0	0%

SETTING UP ACTIVE CAMPAIGN FREE REPORT DOWNLOAD AUTOMATION

PROCESS OVERVIEW

1. Duplicate existing *Website Order Report Dissemination Email* automation
2. Update the name & trigger tags
3. Using an existing template, create the email

CREATE FREE SECONDARY REPORT ORDER DISSEMINATION AUTOMATION & EMAIL

- a. Find and duplicate/copy an existing *Website Order Report Dissemination Email Automation* > Edit Automation (be sure to duplicate one that is a Free Secondary Report, not a TIN Report or Paid Secondary Report)
- b. Update Automation Name with correct report name (ie: Website Order Dissemination – 2022 Agritech Insights Report)
- c. Update the trigger to the correct tag. The easiest way to do this is to simply edit the trigger and change the report name (report name=the name input on the Report download page in the first entry field on the top of the page). This will automatically create the tags. The correct naming conventions need to have been used for the report product page (ie: Wordpress Dashboard > TIN Reports & Membership > Add New > ____).
- d. IMPORTANT NOTE: The tags are automatically created from the website order form using the page and product titles you create. It is imperative that you stick to the correct naming conventions for the tags and automations to work correctly and end users to receive their report access. The dynamically created tag merge tag formula is this: Downloaded-{embed_post:post_title}. This equates to Downloaded-Post Title, with post title = the title of the post you created in this section from Wordpress Dashboard > TIN Reports & Membership > Add New > the text input in the first box on the screen above the “Report Information” section. **A final tag will read Downloaded-2022 Agritech Insights Report.**

TIN MEMBERSHIP PURCHASE SETUP

The TIN Membership Product is already setup and does not need regular updates or changes, save an annual update to the Membership Subscription Form Notification to replace the outdated TIN Report access link and password with the updated ones. The below information serves as an FYI.

OVERVIEW

FUNCTIONAL/STRUCTURAL OVERVIEW

The membership purchase setup consists of the following 3 components:

- Membership Subscription Form: Wordpress Dashboard > Forms > Membership Subscription Form
 - a. This is where you go to update the pricing that appears on the form (inclusive of GST). Note this is the price that is charged.
 - b. This is where you go to add/remove/change membership purchase options as they appear on the order form (and are charged in Stripe)
 - c. Note: when someone makes a purchase, they are given one of the following tags: TIN Member-Small Technology Company // TIN Member-Large Technology Company // TIN Member-Pre-Revenue Company // TIN Member-Affiliate Company
- Membership Product: Wordpress Dashboard> TIN Reports & Membership > Search Membership >Edit
 - a. This is where you go to update any information that is displayed on the membership purchase page
 - b. This is where you go to add/remove/change any membership purchase option information that is displayed on the purchase page. Note the pricing here is exclusive of GST
- Active Campaign Automations:
 - a. Membership Sales – Purchased Membership – triggered off of one of the following tags: TIN Member-Small Technology Company // TIN Member-Large Technology Company // TIN Member-Pre-Revenue Company // TIN Member-Affiliate Company. This automation ends other automations, but most importantly send them a personalised email from Bettina
 - b. Membership Sales – 9.1 Deal Won Online Purchase - triggered off of one of the following tags: TIN Member-Small Technology Company // TIN Member-Large Technology Company // TIN Member-Pre-Revenue Company // TIN Member-Affiliate Company. This automation updates the deal status to won.
 - c. Membership Onboarding – 1.1 -1.4 (Large tech, pre-revenue, small tech, affiliate): These automation trigger based on the associated tag and serve the following three purposes
 - i. Update the account/organisation field “Membership Status” with the correct membership type for the company
 - ii. Update the membership start date for the company
 - iii. Add the membership purchaser tag (just helpful info to know)
 - iv. Add the “TIN Member” tag – used for creating segments and conditional paragraphs in marketing/event emails

- d. Membership Onboarding – 3.Welcome Email: triggered off of one of the following tags: TIN Member-Small Technology Company // TIN Member-Large Technology Company // TIN Member-Pre-Revenue Company // TIN Member-Affiliate Company. This automation distributes the correct welcome email. This automation can be manually triggered by adding the tag “TIN Member – Welcome Email” to any additional employees at a company who need to receive the email.

END USER EXPERIENCE OVERVIEW

- End user lands on the membership purchase page & clicks “join now” button
- Off canvas modal opens, revealing simplified order form where end user chooses and purchases the correct membership type for their company
- End user receives three emails:
 1. Membership order invoice distributed from website/Gravity forms. This email includes the GST information, access link and password to the latest TIN Report, and a link to the membership information page on the website that provides the links to submit the membership profile form, etc.
 2. Personalised membership email from Bettina delivered by Active Campaign
 3. Membership welcome email delivered by Active Campaign. This email includes the access link and password to the latest TIN Report, and a link to the membership information page on the website that provides the links to submit the membership profile form, etc.
- End user is opted into receive TIN updates moving forward
- Bettina can then manually add the tag “TIN Member – Welcome Email” to any additional employees at a company who need to receive the email.

IMPORTANT NOTES ABOUT MEMBERSHIP

- In the Gravity Form Active Campaign Feed – the organisation field has to be mapped in order for the Active Campaign automations to work correctly. If this field is not mapped, the automation step to update the “Membership Status” on the account/organisation does not happen, which causes the Welcome Email automation to fall over. When someone makes a purchase, if you notice they have entered their company name different than what we have in Active Campaign, you can attach them to the correct company/organisation, ensuring the correct “membership status” is set for the company/organisation and then delete the duplicate company/organisation they created.
- In the Gravity Form Notification to send the Invoice, the event that triggers the email notification is “form submitted” rather than “payment completed” (like all of the other order forms). This is because membership is a subscription, rather than a one-off payment. Stripe will not let the form submit until the credit card details are correct (ie. Correct credit card number, CVC, expiration date; it also will decline before form submission for insufficient funds, stolen card, etc.).

- The Membership – Bulk Membership Status Update Blank>Non Member has a 1 day wait step. If there is no wait step it messes up the welcome and onboarding automations as it overrides the update of the Membership Status field on the account level.

HOW TO UPDATE MEMBERSHIP OFFERINGS/PRICING

UPDATE THE MEMBERSHIP SUBSCRIPTION FORM

1. Wordpress Dashboard > Forms > Edit
2. Scroll to “Choose Membership Type” and click “Edit Choices.” Enter the updated membership offerings and prices, **inclusive** of GST

The screenshot shows the WordPress Forms plugin interface for editing the 'Membership Subscription Form'. The 'Choose Membership Type' field is selected, and the 'Edit Choices' panel is open, displaying a table of membership options with labels and prices.

Label	Price
Small Technology Company	\$ 1,144.25
Large Technology Company	\$ 2,875.00
Pre-Revenue Company	\$ 569.25
Affiliate Company	\$ 2,300.00

The 'Edit Choices' panel also includes options for 'Show Values', 'Add Bulk Choices', and 'Bulk Add / Predefined Choices'. The 'Field Settings' panel on the right shows the field type as 'Drop Down' and the field label as 'Choose Membership Type'.

UPDATE THE MEMBERSHIP PRODUCT PAGE

1. Wordpress Dashboard > TIN Reports & Membership > Search Membership > Edit
2. You can Edit the following items on the Membership Purchase Page from here:
 - a. Membership description text – this is the elevator pitch for membership
 - b. Membership promotion text – this is the red text that appears above the “join now” button
 - c. Membership disclaimer text – this is the first block of italic text that appears below the “submit” button on the subscription form and is used to indicate that this is a recurring charge
 - d. Membership Starting Price – input the **least expensive** membership price, **exclusive** of GST. If you update the membership offerings/pricing please ensure that this field is updated as well.
 - e. Membership Types - this section is a “repeater” meaning you can click the “add row” button if you need to add an additional membership type(s). Otherwise, you can edit the types that are there. You can edit the membership type title, description, and price, **exclusive** of GST.

Regarding Coupons:

- Coupon codes are available for use on membership. So far, there has only been one instance where we have done this, therefore I have not included it on the product page as a blanket option. If you want to provide someone with a coupon, simply create the coupon code in Gravity Forms and supply it to them. Note that what ever price they are charged is what will be the recurring charge for the next year.
- If you need to add a coupon code which you want to be displayed on the website, please contact Ashley.
- If you need to setup a trial period option, please contact Ashley.

Once a year, the Active Campaign event list needs to be updated. This is done to reduce the number of unsubscribes from the master event list, "Receive info on TIN Events"

7. Create a new LIST in Active Campaign titled Event – YEAR (ie. Event – 2024)
8. Update the Gravity Form Template, "TEMPLATE: Event Registration Form" by navigating to the form>Settings>Active Campaign.
 - a. Edit each of the 10 Attendee Feeds so that they subscribe to the correct year list (ie, the one you just created); **and**
 - b. Update the tag structure with the correct year (under the "Tags" heading).

The screenshot shows the Gravity Forms interface for the 'TEMPLATE: Event Registration Form'. The 'Active Campaign' settings are visible, including the 'ActiveCampaign List (Required)' dropdown set to 'Event - 2023' and the 'Tags' field set to 'Event - 2023 - (Event Name:74) - Registered'. Both the dropdown and the tag field are highlighted with yellow boxes and green arrows.

9. Update the Gravity Form Template, "TEMPLATE: Event Save the Date Registration of Interest" by navigating to the form>Settings>Active Campaign.
 - a. Edit the "save the date" feed so that they subscribe to the correct year list (ie, the one you just created); **and**

- b. Update the tag structure with the correct year (under the "Tags" heading)

EVENT SETUP PROCESS OVERVIEW

1. Setup event forms in Gravity Forms
 - a. Save the date "register your interest form" (if required)
 - b. Event registration form – there are two template options, one for a standard event and one for a report launch with option to preorder the report
2. Setup event registration page
3. Test!

SETTING UP THE EVENT SAVE THE DATE REGISTRATION OF INTEREST FORM

Create this form and set the event to "save the date" if the event details have yet to be confirmed and end users are not yet able to purchase tickets. When the end user fills out this form, they will be subscribed to the Events-YEAR list in Active Campaign and given an event specific tag. When you send out the invite for the event, be sure that anyone who subscribed to receive updates on this event, receives the invite.

1. Wordpress dashboard> Forms> Search "template"> hover over the form titled "TEMPLATE: Event Save the Date Registration of Interest" and select "Duplicate"
2. Update the duplicated form by hovering over settings and select "form settings"
 1. Form Settings: Update the form title to: YEAR Name of Event – Save the Date Registration of Interest (ie: 2023 Investor's Guide Launch - Save the Date Registration of Interest). Always put the year first as it makes searching and managing the forms much easier. Click Save Settings at the bottom of the page.
3. You don't need to update anything else on this form. Once someone submits the form, they will receive a tag in Active Campaign (Event-2023-{Event Name:74}-Expression of Interest). When you go to send the invites once registration opens, you need to be sure that everyone with that tag receives an invite.

SETTING UP THE EVENT REGISTRATION FORM

Once an event is bookable, please select "bookable event" on the event registration page (Wordpress Dashboard>Events). The form outlined below is the order form used to process the purchase/payment for the event tickets. Once the end user purchases a ticket, the attendees are subscribed to

the Active Campaign Event-YEAR list, given an event specific “registered” tag. The invoice is sent to the purchaser via Gravity Forms and the attendees are notified via Gravity Forms that a ticket has been purchased for them.

STANDARD EVENT REGISTRATION FORM

1. Wordpress dashboard> Forms> Search “template”> hover over the form titled “TEMPLATE: Event Registration Form” and select “Duplicate”
2. Update the duplicated form by hovering over settings and select “form settings”
 1. Update the form title to: YEAR Name of Event Event Registration Form (ie: 2023 Investor's Guide Launch Event Registration Form). Always put the year first as it makes searching and managing the forms much easier. Click Save Settings at the bottom of the page. Click “save settings” at the bottom of the page.

The screenshot shows the Gravity Forms interface. At the top, there's a blue header with the Gravity Forms logo. Below it, a navigation bar shows '2023 Investor's Guide Launch - Event Registration For...' with tabs for 'Edit', 'Settings', and 'Entries'. A green arrow points to the 'Settings' tab. Below the navigation bar, there's a sidebar with various settings categories: 'Form Settings', 'Confirmations', 'Notifications', 'Personal Data', 'ActiveCampaign', 'Post Creation', and 'Stripe'. The main content area shows the 'Form Basics' section. It has a 'Form Title (Required)' field with the text '2023 Investor's Guide Launch - Event Registration Form'. A green arrow points to this field. Below it is a 'Form Description' field. At the top left of the main content area, there's a green checkmark and the text 'Settings updated.'.

3. Edit the form fields (ticket price, etc), by selecting Edit. **Note it is very important that you do NOT change the titles of the fields, or anything other than what is indicated below. The fields, as they are setup in the template, are used as merge fields to create the invoice. If you change them, the invoice will not work.**
 - a. Ticket Price: Click on “ticket price” and update to the correct single ticket price, INCLUDING gst.

- b. Select "Disable Quantity Field"
- c. Click "save form" at the top of the page

The screenshot shows the '2024 TIN Report Launch Event Registration Form (1)' editor. The top navigation bar includes 'Settings', 'Entries', 'Embed', 'Preview', and 'Save Form' buttons. The form layout on the left includes fields for 'Job Title' and 'Company', a 'Ticket Price' section with a price of \$10.00 (including GST), a 'Ticket Quantity' field, and a 'Total' of \$0.00 (including GST). The right sidebar, titled 'Field Settings', shows the 'Product' field settings. Under the 'General' tab, the 'Field Label' is 'Ticket Price', the 'Description' is 'including GST', and the 'Field Type' is 'Single Product'. The 'Price' is set to '\$ 160.00'. A green checkmark icon next to the 'Price' field is labeled '2'. A green checkmark icon next to the 'Disable quantity field' option is labeled '3'. The 'Rules' section includes 'Required' and 'No Duplicates' checkboxes.

- 4. Update the event attendee email notification settings: Settings>Notifications > Event Ticket Attendees - Registration Confirmation. Scroll to the "message" area and add in the details for date; time; location; dress code. Select "update notification"

SETTING UP EVENT COUPON CODES

New coupon codes must be created (rather than re-used) for each event, as coupon codes are applied to specific forms OR every form. (You can't apply them to a specific set of forms, say only the event registration forms. Meaning, this would allow someone to use a member 100% discount code on anything else on the site rather than just on events.)

Backstory: on the old website we had more granular control over coupons. They could apply only to specific purchase types, automatically be entered at checkout depending on what was in your cart, etc. With the new website build, and moving away from Woocommerce (and the coupon plugin we used), we knew that our coupon functionality would be much more basic, but as a team decided that this was still the best move, for many reasons. Please ask Ashley if you want to delve into this further.

To setup a new coupon code:

1. Wordpress Dashboard >Forms >Coupons >Add New (or duplicate an existing coupon and change what form it is applied to)
2. Select which Gravity Form this coupon should apply to. **Note: if you set a coupon code to “any form” then that discount can be used on any product we sell. ie. If it's an event coupon, and it is set to “any form” it could be applied to report purchases, membership purchases, etc.**
3. Fill in the required fields:
 - a. Coupon Name: name it so you know what it is
 - b. Coupon Code: The actual coupon code
 - c. Coupon amount: choose between flat rate (a specified dollar discount) or a percentage (a percentage discount)
 - d. Start Date: date the coupon can be used from
 - e. End date: date the coupon expires
 - f. Usage Limit: how many times TOTAL can this coupon be used? Not per user, but TOTAL.
 - g. Is stackable?: can this coupon be used in conjunction with other coupons?
 - h. Save Setting

Notes:

- Free tickets: you'll often give free tickets to members, sponsors or media. Depending on how you want to do reporting on the coupon usage, you can either setup an individual coupon code for each use case above, or you can set up a single VIP coupon code. You would use the

coupon amount "percentage" option and set it to 100%. If you choose to use one coupon code, once you have your registration list, you would be able to see who are members/sponsors/media and get your tally that way, or you can use an individual code for each category. I would probably lean towards using one coupon code as it simplifies the coupon code distribution process, and the events manager should be going through the registration and attendee lists during the post event reporting to show the number/percentage of attendee types.

- Membership coupons: as you can't limit the number of times an end user uses a specific coupon, this is something that we agreed is easy enough to manage. If a member is allowed 2 free tickets and uses their coupon code to purchase 5 free tickets, we said we would monitor it and proceed as required. If it becomes a larger problem we could re-evaluate the coupon setup.

SETTING UP THE EVENT REGISTRATION PAGE

1. Wordpress dashboard > TIN Events> Add New
2. Fill in required event details, including:

- a. Event permalink – in the “add event field” at the top of the page enter the event name and when the permalink appears, adjust appropriately for SEO (remove stop words, adjust length, etc)
- b. Event name: enter the event name, excluding the word “the”
- c. Event graphic - Images should be 1500x600px. Images should aim to be less than 200kb in size. Very complex images may be slightly larger. Use a .jpg whenever you can. Very complex images may require .png
- d. Event graphic square: Images should be 800x800px in a 1:1 ratio. Images should aim to be less than 200kb in size. Very complex images may be slightly larger.
- e. Event headline: optional, but good for SEO and end user readability. On the event registration page, this is the red headline that appears below the event graphic and above the event description
- f. Event type: Physical or Virtual
- g. Who is managing registrations for this event (TIN or third party)? : this field controls the functionality of the registration form and buttons. If it is a TIN hosted event, there is an order form that appears. If it is third party a simple button appears that allows you to link to their registration platform.
- h. Is this event sponsored?: If you select yes, you'll have the option to input the event sponsors so that their logos appear on the event registration page
- i. Is this even a report launch?: If you select yes, you'll have the option to input the report sponsors so that their logos appear on the event registration page
- j. Event Status (save the date vs bookable event): This changes which form shows on the event registration page and toggles on and off different sets of information.
 - i. Save the date: If you do NOT have the date/time/location finalised, set this to “save the date”. A “save the date registration” tab will appear below where you can input the shortcode for a Gravity Form used to collect email addresses for individuals who want to be notified when registrations are open for the report. The register your interest gravity form subscribes them to the event list and main list and gives them an event specific tag so that you can be sure to include them when you send the invitations.
 - ii. Bookable event: once you have the date/time/location, set this to “bookable event.” A “registration form” tab will appear:
 1. TIN Registration Form Shortcode: input the Gravity Form shortcode used to register for the event
 2. Off Canvas data-x-toggleable Value: this is the code specific to the off-canvas modal created by the layout on this page. When you input it in this field, it gets coded to the “register now” button on the right sidebar menu at the top of the registration page so that the button will also open the off canvas modal. To find the data-x-toggleable value: right click the off-canvas modal>inspect. Find the portion of code associated with the off-canvas modal that reads: data-x-toggle=”1” data-x-toggleable=”e24231-e84”. Copy value and enter it in this field; in this case reads: e24231-e84. You can watch a video of this [here](#). (Sharepoint>Documents>Digital Media>Website>Website How to & Templates)

TIN - Technology Investment Network Customise 1 0 + New Edit Event Cornerstone

A Celebration of the New Zealand Tech Sector Not to Be Missed!

Join TIN and the wider tech community on Thursday 16 November at the Maritime Room, 6 pm - 9 pm as we all celebrate the successes of 2023 at the TIN Report Launch & Awards!

This evening is a unique opportunity to network with pioneering industry leaders and creative innovators over bubbles and canapés. Meet the companies making waves in the sector and be amongst the first to discover the research findings from the 2023 TIN Report..

Date: November 16, 2023

Time: 6:00 pm - 9:00 pm

Location: The Maritime Room
Princes Wharf
Auckland 1010

Dress Code: Cocktail Attire

REGISTER NOW

Agenda:

- 6:00 pm - Networking Drinks & Nibbles
- 7:00 pm - Awards Ceremony
- 8:00 pm - Networking
- 9:00 pm - Event Concludes

REGISTER NOW

- Is this event sold out?: if you select yes, the "register now" buttons will disappear and a sold out banner will appear on the event image and in place of the register now button
- Save the date registration: If this is a save the date, please enter the shortcode of the form end users can use to register their interest for the event.
- Time & Location: input the required fields and provide a dress code if needed
- Panellists: select yes if the event has panellists and a repeater field will appear below. Click "add row." If selected, this will cause a "panellists" section to appear on the event registration page.
 - Input the required fields. Note that the panellist headshot has to be a 1:1 ratio, square image, 800x800px. You can use a color image. The event registration layout will automatically make the image a circle and filter it to high contrast black and white.
- Speakers: select yes if the event has speakers and a repeater field will appear below. Click "add row." If selected, this will cause a "speaker" section to appear on the event registration page.
 - Input the required fields. Note that the speaker headshot has to be a 1:1 ratio, square image, 800x800px. You can use a color image. The event registration layout will automatically make the image a circle and filter it to high contrast black and white.

- p. Agenda: select yes if you have a publishable agenda and a repeater field will appear. Click “add row” and input the required information.
- q. Registration Form: input the Gravity Form shortcode used to register for the event
- 3. Save Draft if the page and/or Gravity Form(s) are not finalised.
- 4. Once the page is finalised, test, test, test!

TESTING THE EVENT PAGE

1. View event page on all media device sizes and browsers; does it look right? View event registration page too.
2. Click all of the links and buttons to make sure they function correctly.
3. Process the event save the date form and make sure it goes through. Then check active campaign and make sure you received the correct tag.
4. If your page passes testing and is ready to go live with the save the date form, you can publish now. Once published, have one last look to make sure everything looks and works as expected.

TESTING THE EVENT REGISTRATION FORM (IE. PAYMENT PROCESSING)

Before you make the event registration page live with the registration form that collects payment, please thoroughly test the page! Note, to do this, you will either need to test the form in the staging environment (recommended) or change the site to “construction mode.” I do not recommend working in construction mode if at all possible as it takes the live site off line.

Before you work in the staging site, please be aware that:

1. **Get as much of the page and forms setup as possible before cloning the live site to the staging site, but without making your order form live.**
2. **Anything that happens on the live site while you are working in the staging environment, will be over written if you push your staging environment to the live site. Ie, if someone purchases membership or downloads a report from the live site and then you push the staging environment live, it will overwrite naytning that has happened since you cloned the live site to the staging environment. As such, keep an eye on what is going on. If orders have come through, you may want to re-clone the live site to the staging environment and start over any changes you have made before you push it live. Or, if everything worked as expected in the staging environment, you don’t need to push it to live, simply go to your live environment and change the event so that the registration form is live rather than the save the date form.**
3. **Do NOT leave the Stripe settings in “test” mode. You must turn it back to “live” mode when you complete testing. If the live site is in “test” mode, end users will NOT be charged for purchases.** See screenshot on step 3 below.

To test the event registration form in the staging environment, please do the following:

1. Flywheel>staging> reset staging. Check "yes reset staging environment" checkbox and enter your password. DO NOT CLICK LAUNCH STAGING CHANGES it will overwrite the current site.

4. Make the necessary changes and update the page (ie: change the event to bookable event and update the event registration form shortcode).
5. Navigate to your event page on the front end and test, test, test!
 1. Look in responsive design mode and make sure everything looks correct across device sizes and browsers
 2. Purchase a ticket using [Stripe test cards](#)
 3. Test coupon codes if applicable
 4. Enter different email addresses for purchaser and attendee to make sure invoice and registration emails are sent correctly
 5. Use +1 email convention to test
6. **Once you process the event registration form, check the following**
 - a) **Forms > entries – make sure gravity forms has logged your entry**
 - b) **Check the email address you used for the purchaser to be sure that you received the invoice email (check that all of the merge fields worked)**
 - c) **Check email address(es) you used for the attendee to be sure you received the attendee emails (check that all of the merge fields worked)**
 - d) **Check active campaign to be sure attendees were tagged correctly. Note that no tag is setup for the purchaser, so no need to check the purchaser for a tag.**
6. **Once everything is working correctly, navigate back to Wordpress Dashboard > Forms > Settings > Stripe > and put it back in **LIVE** mode, click save**
7. Navigate back to Flywheel dashboard and “launch staging changes” (check all checkboxes before entering your password). **Note, no changes were made other than changing the event to “bookable” and adding the shortcode, you can navigate to your live site and make these modifications rather than launching staging changes. Remember that any purchases or activities that happened on the live site while you were working in the staging environment will be overwritten if you “launch staging changes.” Be mindful of this and how you work.**

Move staging changes to live site

When moving changes from your staging site to your live site, any modified themes or plugins will be overwritten. All staging upload files will be merged into your live site's uploads folder.

- ☒ Copy staging database to production (WARNING: overwrites live database)
- ☒ Backup the current live site before moving changes
- ☒ Yes, I am sure I want to move staging changes to my live site

Enter your Flywheel password

.....

 **MOVE CHANGES TO LIVE SITE NOW**

AFTER AN EVENT

Once an event is past, the post needs to be set to draft status in order to remove it from the event calendar. You will also need to setup a 301 redirect (in Flywheel) from the event registration page to the main event page. Follow the steps [here](#).

EVENT SURVEY

Once an event is complete, you need to create an event feedback survey. Embed that survey onto the "Event Feedback Survey" page. In the off chance that you have multiple surveys out at once, you may need to create a separate page for an individual survey, but do not create a new page for each event survey otherwise. If you do need to create a new page for a survey, please be sure to delete this page once the survey is complete.

REPORT LANDING PAGES

TIN REPORT LANDING PAGES

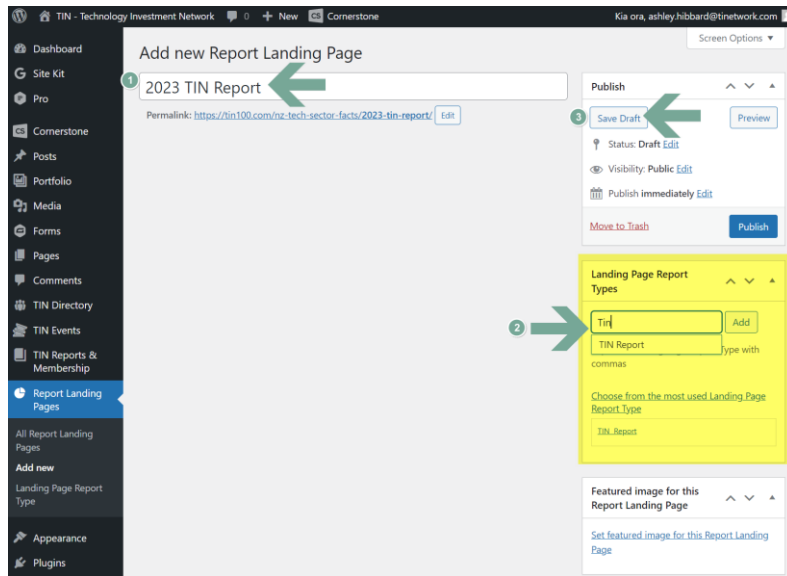

Each year, you will create a new TIN Report Landing page. **Do NOT publish this page until AFTER the Launch of the TIN Report as it contains embargoed information.** When you are advertising the launch of the upcoming TIN Report and are doing pre-orders of the soon to be released TIN Report, you can link to this page as your teaser of the type of information the TIN Report contains. Note that you will need to adjust the setting under the “Call to Action tab” to change the landing page from sneak peak to pre-sale offer. This will change the verbiage in the first black call to action box at the top of the screen and adjust the information included in the pricing table.

TIN REPORT LANDING PAGE PROCESS OVERVIEW:

1. Change current TIN Report Landing Page from sneak Peek to pre-order & update the required fields, including link to pre-order/purchase early bird Report & launch tickets. You can use the link to this updated landing page to advertise the upcoming TIN Report
2. Create new TIN Report Landing Page & save as draft
3. **AFTER** the Launch of the TIN Report, publish TIN Report landing page
4. Update Menus (outlined in “Navigation Menu” step below)
5. Update old landing page to remove from navigation menu and change to “draft” status
6. Add the landing page link to the product page

TO CREATE A NEW TIN REPORT LANDING PAGE:

1. Wordpress Dashboard > Report Landing Pages > Add New
 - a. Enter the report name in the permalink field: YEAR TIN Report (ie: 2022 TIN Report, 2023 TIN Report, etc.). Take note of this this permalink as it is what you will want to link to in the press release.
 - b. Enter the “Landing Page Report Type” category. The options are **TIN Report, Sector Report, Investment Report.** **DO NOT ADD NEW CATEGORY TYPES.** This category tag is used to determine what post fields show on this page. If you create a new category, there will be no post fields or landing page layout associated with it, so no landing page will be created. **Do not enter more than one category** as multiple post field types and landing page layouts will be assigned, and the landing page will not work.
 - c. Save Draft – once you “save draft” the post fields will appear.

2. Enter the post fields:

- a. Report name: copy and paste report name from above
- b. Subtitle: short subtitle summarising highlights of reports. Generally, this adapted from the top line of the press release, so it may be prudent to not enter this field until the press release is finalised. Make sure this is entered in sentence case and **NOT** all capitals.
- c. Report overview: Enter the elevator pitch of the Report. This is best adapted from the summarising paragraph of the press release. Be sure to include the key words of the page for SEO purposes (ie: Fintech, Agritech, etc.)
- d. Report Image: add the image that is used for the product listing. This is a 1:1 ratio, square image.
- e. Report purchase link: add the link to the report product where you purchase or download the report (ie. The link that will be created when you create the page at Wordpress Dashboard > TIN Reports & Membership > Add New)
- f. Revenue
 - i. Revenue Growth Percentage: enter the correct value. This is generally found on the Key Highlights page of the TIN Report. Please use correct decimal rounding to be consistent with the TIN Report. This is used to generate the graphs in the key highlights section of the landing page.
 - ii. Current year Revenue \$: enter the correct value. This is generally found on the Key Highlights page of the TIN Report. Please use correct decimal rounding to be consistent with the TIN Report. This is used to generate the graphs in the key highlights section of the landing page.

- iii. Previous Year Revenue: enter the correct value. This is generally found on the Key Highlights page of the TIN Report. Please use correct decimal rounding to be consistent with the TIN Report. This is used to generate the graphs in the key highlights section of the landing page.
- iv. Revenue Bar Length (current year & previous year): These percentages determine the length of the bars on the Revenue Growth bar graph on the front end. **There is no percentage for this in the TIN Report as it is not a fact...this is just the percentage length of the bars to show the correct growth/decline of revenue year-on-year.** Depending on the disparity between the previous year and current year revenue, you may need to adjust the bar lengths to indicate greater or lesser revenue growth, or if there is a revenue decline. 92% // 80% is a good starting point. 95% // 75% would show greater growth. 90% // 85% would show lesser growth. 82% // 90% would show a decline. Try different numbers, save, and refresh/view on the front end until you get it to be representative of this year's change. Note that it has been set at 92% // 80% since 2016 as we've had steady growth, so unless there is a big disparity, the bar lengths probably do not need to be adjusted. **You must enter the percentage sign (%) following the number otherwise the bar will not load correctly.** This is used to generate the graphs in the key highlights section of the landing page.

g. Staff

- i. Staff growth percentage: enter the correct value. This is generally found on the Key Highlights page of the TIN Report. Please use correct decimal rounding to be consistent with the TIN Report. This is used to generate the graphs in the key highlights section of the landing page.
- ii. Current year staff count: enter the correct value. This is generally found on the Key Highlights page of the TIN Report. Please use correct decimal rounding to be consistent with the TIN Report. This is used to generate the graphs in the key highlights section of the landing page.
- iii. Previous year staff count: enter the correct value. This is generally found on the Key Highlights page of the TIN Report. Please use correct decimal rounding to be consistent with the TIN Report. This is used to generate the graphs in the key highlights section of the landing page.
- iv. Staff bar length (current year & previous year): These percentages determine the length of the bars on the Staff Growth bar graph on the front end. **There is no percentage for this in the TIN Report as it is not a fact...this is just the percentage length of the bars to show the correct growth/decline of staff year-on-year.** Depending on the disparity between the previous year and current year staff, you may need to adjust the bar lengths to indicate greater or lesser staff growth, or if there is a staff decline. 92% // 80% is a good starting point. 95% // 75% would show greater growth. 90% // 85% would show lesser growth. 82% // 90% would show a decline. Try different numbers, save, and refresh/view on the front end until you get it to be representative of this year's change. Note that it has been set at 92% // 80% since 2016 as we've had steady growth, so unless there is a big disparity, the bar lengths probably do not need to be adjusted. **You must enter the percentage sign (%) following the number otherwise the bar will not load correctly.** This is used to generate the graphs in the key highlights section of the landing page.

h. Exports:

- i. Export Growth Percentage: enter the correct value. This is generally found on the Key Highlights page of the TIN Report. Please use correct decimal rounding to be consistent with the TIN Report. This is used to generate the graphs in the key highlights section of the landing page.
- ii. Current Year Export \$: enter the correct value. This is generally found on the Key Highlights page of the TIN Report. Please use correct decimal rounding to be consistent with the TIN Report. This is used to generate the graphs in the key highlights section of the landing page.
- iii. Previous Year Export \$: enter the correct value. This is generally found on the Key Highlights page of the TIN Report. Please use correct decimal rounding to be consistent with the TIN Report. This is used to generate the graphs in the key highlights section of the landing page.
- iv. Export bar length (current year & previous year): These percentages determine the length of the bars on the Export Growth bar graph on the front end. **There is no percentage for this in the TIN Report as it is not a fact...this is just the percentage length of the bars to show the correct growth/decline of exports year-on-year.** Depending on the disparity between the previous year and current year staff, you may need to adjust the bar lengths to indicate greater or lesser export growth, or if there is a export decline. 78% // 68% is a good starting point. 92% // 80% would show greater growth. 70% // 65% would show lesser growth. 68% // 78% would show a decline. Try different numbers, save, and refresh/view on the front end until you get it to be representative of this year's change. Note that it has been set at 78% //68% since 2016 as we've had steady growth, so unless there is a big disparity, the bar lengths probably do not need to be adjusted. **You must enter the percentage sign (%) following the number otherwise the bar will not load correctly.** This is used to generate the graphs in the key highlights section of the landing page.
- i. Primary Sectors: Currently this graph is created in Power Point and exported as an image. Use the Power Point template, "Revenue by Primary Sector" to create the pie chart. Please upload a .png that is 800x800px. The instructions to update the pie chart are written in the Power Point template. **Note, do not change the distribution of colors as the key is hard coded on the website.** *(In June/July 2023, Themeco has a planned release that will give the ability to build pie graphs natively within the website. If you would like this portion of the landing page creation to be adjusted, contact Ashley who can build out this small portion. It shouldn't take long.)*
- j. Stats: These are the facts and figures used to create the headlines, labels and stats section of the landing page.
 - i. Report year: enter the correct year of the report which you are creating a landing page for
 - ii. Previous report year: enter the correct year for the last report which you are comparing with this report in the key highlights section (this is used to generate the labels on the bar charts)
 - iii. Number of companies surveyed: be sure this number is consistent with what is published in the press release for this report. Use a rounded number, not an exact number.
 - iv. Total reports distributed: Please enter the total number of reports that have been distributed by TIN. Please use the current number as the base number and then add additional reports that have been distributed in the last year, including all paid and free reports. (As of May 2023, roughly 12,000 reports have been distributed by TIN). A spreadsheet with this info can be maintained here - [Total Reports Distributed-Info for TIN Report Landing Page.xlsx](#)

- v. Total Reports produced: Please enter the total number of reports that have been produced by TIN. Please use the current number as the base number and then add additional reports that have been produced in the last year, including all paid and free reports. This is the number of TIN Reports, Investor Guides, Sector Reports and privately commissioned reports (As of May 2023, 33 reports have been produced by TIN). This information is also on the spreadsheet - [Total Reports Distributed-Info for TIN Report Landing Page.xlsx](#)
 - vi. Affiliated Organisations: Please enter the total number of affiliated organisations by adding the current member count to the total sponsor count (across all paid and free reports) for the last two years.
- k. Pre-Order vs Sneak Peak
 - i. Please select whether you are currently pre-selling the report, or it has been released and the information below is a sneak peak.
 - ii. Note this setting will change throughout the year around the time of the launch of the TIN Report. I.e. When a new TIN Report landing page goes live, right after the launch of the most recent TIN Report, this setting should be set to "sneak peak" as you offering a sneak peak of the current Report with up-to-date information. Later in the year, when you are selling launch tickets and trying to pre-sale next year's Report, select "pre-order offer" as the information on the page outdated and is a sample of the information you will get in the soon-to-be-released TIN Report.
 - iii. This setting controls the text that appears in the first black box near the top of the page. It also controls which version of the pricing table appears. The pre-order pricing table shows options for: 1) TIN Report 2) TIN Report + Launch Tickets 3) Membership. The sneak peek pricing table shows options for: 1) Standalone TIN Report 2) TIN Report Bundle 3) Membership
- l. Industry Feedback: Enter 2-3 reviews for the TIN Report. If there are no new reviews, you can enter the reviews from last year's Report. Just copy and paste them and be sure to select the correct photos.
 - i. Reviewer Name:
 - ii. Reviewer Job title:
 - iii. Reviewer company:
 - iv. Reviewer headshot: Please upload a 800x800px, square, 1:1 ratio, headshot of the panellist, maximum 200kb.
 - v. Review: Enter the review without quotation marks. Note the 250 character count limit.
- 3. Navigation Menu: the options here control whether or not this landing page appears in the top bar and mega menu navigation throughout the website.
 - a. Include in Navigation Menus: select "yes," when a report is launched and the page is published and this is the landing page that end users should access. Once a new report is launched, you must navigate to the old landing page and change this setting to "no".
 - b. SEO Menu Title Text: This is the text that is displayed in the top bar. The purpose of this bar is for quick navigation to Report landing pages and SEO. Do NOT change this title without thoughtful and thorough research into the best keyword to target for the TIN Report landing page. This text must be kept short and succinct so that each landing page can fit in the space.
- 4. Save Draft
- 5. AFTER THE LAUNCH OF THE SECTOR REPORT, and once all of the information is filled in, you can publish your landing page.

6. After you publish the landing page
 - a. Navigate to the landing page of the old version of the report and do the following:
 - i. Under the “navigation menu” tab, toggle the setting to “No, this is an old version of this Report, please do NOT include it in the navigation top bar and mega menu.”
 - ii. Change the page status to draft – this is IMPARATIVE for SEO purposes. Having multiple landing pages live for the same report that is targeting the same key word will negatively impact our SEO
 - b. Navigate to the product page of the report and enter the landing page link in to the “Landing Page Link” field. This will cause a headline to appear on the product page that says “See inside the REPORT NAME” so if an potential client needs more information to make a purchase, they can easily navigate to the landing page.

INVESTMENT REPORT LANDING PAGE

Create a new Investment Report Landing page for each report that is produced. **Do NOT publish this page until AFTER the launch of the Report as it contains embargoed information.** When you are advertising the launch of the upcoming Investment Report, please navigate to the landing page of the current report and check the “yes, a new version of this report is scheduled” in the “New Report Release” tab. Then you will be prompted to input the release month and given the option to include a marketing-opt in to register interest in the Report. This will add a gray box between the report sponsor and pricing table sections on the landing page advertising than a new report is due to launch.

INVESTMENT REPORT LANDING PAGE PROCESS OVERVIEW:

1. Create new Investment Report Landing Page & save as draft
2. In current Investment Report Lading Page, utilise the settings in the “New Report Release” tab
3. **AFTER** the Launch of the Report, publish new Investment Report landing page
4. Update Menus (outlined in “Navigation Menu” step below)
5. Update old landing page to remove from navigation menu and change to “draft” status
6. Add the landing page link to the product page

TO CREATE A NEW INVESTMENT REPORT LANDING PAGE:

1. Wordpress Dashboard > Report Landing Pages > Add New

- c. Enter the report name in the permalink field: YEAR Report Name (ie: 2022 Technology Investment Report, etc.). Take note of this this permalink as it is what you will want to link to in the press release. Adjust the permalink as needed to optimise for SEO.
- d. Enter the "Landing Page Report Type" category. The options are **TIN Report**, **Sector Report**, **Investment Report**. **DO NOT ADD NEW CATEGORY TYPES**. This category tag is used to determine what post fields show on this page. If you create a new category, there will be no post fields or landing page layout associated with it, so no landing page will be created. **Do not enter more than one category** as multiple post field types and landing page layouts will be assigned, and the landing page will not work.
- e. Save Draft – once you "save draft" the post fields will appear.

The screenshot shows the 'Add new Report Landing Page' interface. On the left is a sidebar with navigation links: Dashboard, Site Kit, Pro, Cornerstone, Posts, Portfolio, Media, Forms, Pages, Comments, TIN Directory, TIN Events, TIN Reports & Membership, and Report Landing Pages (highlighted). The main form area has a title field containing '2024 Technology Investment Report' (marked with a green circle 1). Below the title is a permalink field with the URL 'https://tin100.com/nz-tech-sector-facts/2024-technology-investment-report/' and an 'Edit' button. To the right is a 'Publish' section with buttons for 'Save Draft' (marked with a green circle 3), 'Preview', 'Status: Draft Edit', 'Visibility: Public Edit', 'Publish immediately Edit', 'Move to Trash', and a blue 'Publish' button. Below the 'Publish' section is a 'Landing Page Report Types' section highlighted with a yellow box and a green arrow (marked with a green circle 2). This section contains a search bar with the text 'In', a list of 'Investment Report' and 'TIN Report' with a 'type with' label, and an 'Add' button. At the bottom of this section is a link that says 'Choose from the most used Landing Page Report Type'.

7. Enter the post fields:

- a. Report name: copy and paste report name from above
- b. Subtitle: short subtitle summarising highlights of reports. Generally, this adapted from the top line of the press release, so it may be prudent to not enter this field until the press release is finalised. Make sure this is entered in sentence case and **NOT** all capitals.
- c. Report topic: select the correct topic. This is used to populate text throughout the page and nav menus

- d. Report overview: Enter the elevator pitch of the Report. This is best adapted from the summarising paragraph of the press release. Be sure to include the key words of the page for SEO purposes (ie: NZ Investment, start up, etc.)
- e. Report Image: add the image that is used for the product listing. This is a 1:1 ratio, square image.
- f. Report purchase link: add the link to the report product where you purchase or download the report (ie. The link that will be created when you create the page at Wordpress Dashboard > TIN Reports & Membership > Add New)
- g. Accent Color Hex Code: input the hex code for the report accent color, including the # (ie: #ffffff). This is used to change the color of the accents on the page to match the branding of the Report.
- h. Report Sponsors: please tag all report sponsors below. **If there are new sponsors for this Report, they will need to be added to the TIN Tech Directory before you can tag them here.** Be sure to do this so that their logos appear in this section on the landing page.
- i. Tech Investment Highlights: are generally found in the opening key highlights pages of the Investment Report
 - i. Number of Deals
 - ii. Funded \$: enter the correct dollar amount
 - iii. Funded \$ Abbreviation: Input the dollar abbreviation (ie. m for millions or B for billions)
 - iv. Number of Companies:
 - v. Avg. Pre-Series A Raise \$: enter the correct dollar amount
 - vi. Avg. Pre-Series A Raise Abbreviation: Input the dollar abbreviation (ie. m for millions or B for billions)
 - vii. Avg. Series A+ Raise \$: enter the correct dollar amount
 - viii. Avg. Series A+ Raise Abbreviation: Input the dollar abbreviation (ie. m for millions or B for billions)
- j. Investor Type:
 - i. Investor Type Graph: Currently this graph is created in Power Point and exported as an image. Use the Power Point template, "[Pie Graph for Sector Report Landing Pages](#)" to create the pie chart. The instructions to update the pie chart are written in the Power Point template. In an nutshell, select the correct page on the template for your report. Edit the data, adjust colors as necessary. Then "select all" and "copy." Then paste onto a 800x800px artboard in Illustrator; adjust the size of the graph, and export as a .png to upload to the website. Please upload a .png with a transparent background that is 800x800px. *(In June/July 2023, Themeco has a planned release that will give the ability to build pie graphs natively within the website. If you would like this portion of the landing page creation to be adjusted, contact Ashley who can build out this small portion. It shouldn't take long.)*
 - ii. Investor Type Legend: Using the "add row" button, please input each investor type and the hex value (including #) of the color associated with that graph in your pie chart. Once completed, please preview on the front end to make sure that you can see all of the colors clearly and adjust as needed.
- k. Pricing table:
 - i. Pricing table intro text: Please enter a keyword rich intro paragraph outlining the high level benefits of downloading this report. This could be adapted from the press release or intro pages of the report. The purpose of this paragraph is primarily for SEO. Character limit - 1000

- ii. Is this a paid or free report?: Select the correct option and fill in the additional required information if prompted. Note this is used to generate the pricing table section of the landing page and determines which buttons appear in the CTA section at the bottom of the page.
- l. FAQ: Using the "Add FAQ" button, enter a minimum of 3 questions for the FAQ. Note that you can copy and paste options from previous reports, but you will need to adjust the verbiage slightly so as to not be SEO penalised for duplicate content. This section is used for SEO purposes.
 - i. FAQ Question
 - ii. FAQ Answer.
- m. Navigation Menu: the options here control whether or not this landing page appears in the top bar and mega menu navigation throughout the website.
 - i. Include in Navigation Menus: select "yes," when a report is launched and live and this is the landing page that end users should access. Once a new report is launched, you must navigate to the old landing page and change this setting to "no".
- n. New Report Release: This section does not need to be filled in until a new version of this report is scheduled for release. Once this happens, please select the checkbox stating "yes, a new version of this report is scheduled."
 - i. Is a new version of this report scheduled for release?: if so, check yes; and enter the month the new report will be released in the following field.
 - ii. Do you want to include an opt-in form?: if you would like to include an opt-in form on the landing page for end users to register their interest in the Report, please select yes. You will then be prompted to enter the gravity form shortcode for the form. You create the Gravity Form using the below steps, and then input the gravity form ID into the XXXX space.
 - Creating the marketing opt in Gravity Form: Wordpress Dashboard> Forms> search "TEMPLATE: YEAR REPORT NAME Registration of Interest".
 1. Duplicate the form.
 2. Update the form name to specify the actual report name
 3. Note the Gravity Form form ID and insert it into the shortcode on the "New Report Release" tab where you are building the landing page.
 4. When the new report is released, be sure that anyone who registered their interest receives the launch email of the updated report.

8. Save Draft

9. AFTER THE LAUNCH OF THE SECTOR REPORT, and once all of the information is filled in, you can publish your landing page.

10. After you publish the landing page

- a. **Navigate to the landing page of the old version of the report and do the following:**
 - i. **Under the "navigation menu" tab, toggle the setting to "No, this is an old version of this Report, please do NOT include it in the navigation top bar and mega menu."**

- ii. **Change the page status to draft – this is IMPARATIVE for SEO purposes. Having multiple landing pages live for the same report that is targeting the same key word will negatively impact our SEO**
- iii. **Navigate to the product page of the report and enter the landing page link in to the “Landing Page Link” field. This will cause a headline to appear on the product page that says “See inside the REPORT NAME” so if an potential client needs more information to make a purchase, they can easily navigate to the landing page.**

CREATE A SECTOR REPORT LANDING PAGE

Each year, you will create a new Sector Report Landing page for each report that is produced. **Do NOT publish this page until AFTER the launch of the Report as it contains embargoed information.** When you are advertising the launch of the upcoming sector report, please navigate to the landing page of the current report and check the “yes, a new version of this report is scheduled” in the “New Report Release” tab. Then you will be prompted to input the release month and shortcode for the Gravity Form being used to register interest in the Report. This will add a gray box between the report sponsor and pricing table sections on the landing page advertising than a new report is due to launch.

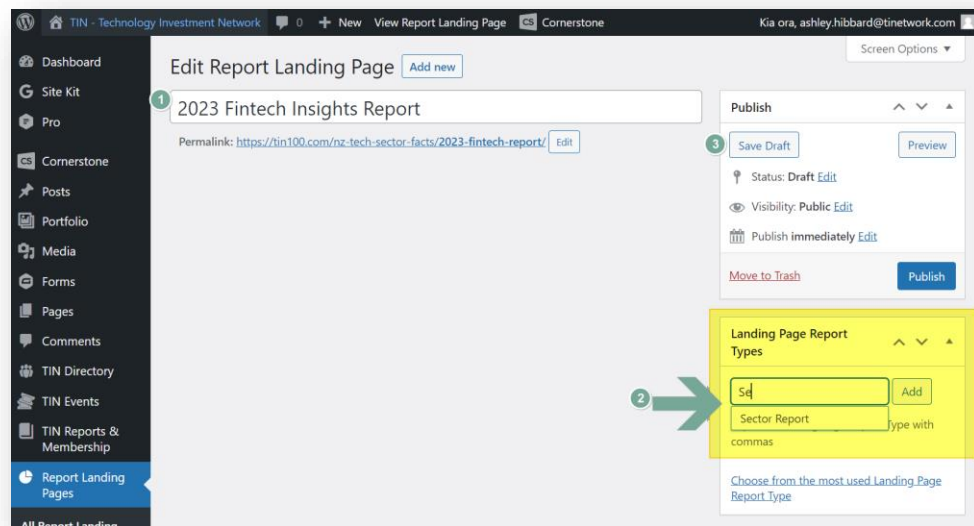

SECTOR REPORT LANDING PAGE PROCESS OVERVIEW:

1. Create new Sector Report Landing Page & save as draft
2. In current Sector Report Landing Page, utilise the settings in the “New Report Release” tab
3. **AFTER** the Launch of the Report, publish new Sector Report landing page
4. Update Menus (outlined in “Navigation Menu” step below)
5. Update old landing page to remove from navigation menu and change to “draft” status
6. Add the landing page link to the product page

TO CREATE A NEW SECTOR REPORT LANDING PAGE:

1. Wordpress Dashboard > Report Landing Pages > Add New
 - b. Enter the report name in the permalink field: YEAR Sector Report Name (ie: 2022 Fintech Insights Report, 2023 Agritech Insights Report, etc.). Take note of this this permalink as it is what you will want to link to in the press release. Adjust the permalink as needed to optimise for SEO.

- c. Enter the “Landing Page Report Type” category. The options are **TIN Report, Sector Report, Investment Report**. **DO NOT ADD NEW CATEGORY TYPES**. This category tag is used to determine what post fields show on this page. If you create a new category, there will be no post fields or landing page layout associated with it, so no landing page will be created. **Do not enter more than one category** as multiple post field types and landing page layouts will be assigned, and the landing page will not work.
- d. Save Draft – once you “save draft” the post fields will appear.

2. Enter the post fields:
 - a. Report name: copy and paste report name from above
 - b. Subtitle: short subtitle summarising highlights of reports. Generally, this adapted from the top line of the press release, so it may be prudent to not enter this field until the press release is finalised. Make sure this is entered in sentence case and **NOT** all capitals.
 - c. Report topic: select the correct topic. This is used to populate text throughout the page and nav menus
 - d. Report overview: Enter the elevator pitch of the Report. This is best adapted from the summarising paragraph of the press release. Be sure to include the key words of the page for SEO purposes (ie: Fintech, Agritech, etc.)
 - e. Report Image: add the image that is used for the product listing. This is a 1:1 ratio, square image.
 - f. Report purchase link: add the link to the report product where you purchase or download the report (ie. The link that will be created when you create the page at Wordpress Dashboard > TIN Reports & Membership > Add New)

- g. Accent Color Hex Code: input the hex code for the report accent color, including the # (ie: #ffffff). This is used to change the color of the accents on the page to match the branding of the Report.
- h. Report Sponsors: please tag all report sponsors below. **If there are new sponsors for this Report, they will need to be added to the TIN Tech Directory before you can tag them here.** Be sure to do this so that their logos appear in this section on the landing page.
- i. Total Revenue
 - i. Current year Revenue \$: enter the correct value. This is generally found on the Key Highlights page of the sector report. Please use correct decimal rounding to be consistent with the report.
 - ii. Revenue Dollar Abbreviation: Input the dollar abbreviation (ie. m for millions or B for billions).
 - iii. Percentage of TIN200 Revenue: input the correct value. This is generally found on the Key Highlights page of the sector report. Please use correct decimal rounding to be consistent with the report.
- j. Revenue Growth:
 - i. Current Year Revenue Growth \$: Input the correct decimal format of the annual revenue growth of the subsector (ie: 1.8) dollar growth amount.
 - ii. Revenue Dollar Abbreviation: Input the dollar abbreviation (ie. m for millions or B for billions).
 - iii. Percentage of TIN200 Revenue: input the correct value. This is generally found on the Key Highlights page of the sector report. Please use correct decimal rounding to be consistent with the report.
- k. Companies
 - i. Number of companies: Input the number of TIN200 companies in this sub-sector. This is generally found on the Key Highlights page of the sector report. Please use correct decimal rounding to be consistent with the report.
 - ii. Percentage of TIN200 Companies: input the correct value. This is generally found on the Key Highlights page of the sector report. Please use correct decimal rounding to be consistent with the report.
- l. Staff
 - i. Current year staff count: input the correct value. This is generally found on the Key Highlights page of the sector report. Please use correct decimal rounding to be consistent with the report.
 - ii. Staff growth percentage: input the correct value. This is generally found on the Key Highlights page of the sector report. Please use correct decimal rounding to be consistent with the report.
- m. R&D
 - i. Current year R&D spend: Input the decimal format of the annual R&D spend for the subsector (ie: 374.6)
 - ii. R&D Dollar Abbreviation: Input the dollar abbreviation (ie. m for millions or B for billions).
 - iii. R&D Percentage Growth: input the correct value. This is generally found on the Key Highlights page of the sector report. Please use correct decimal rounding to be consistent with the report.
- n. Revenue by Category:
 - i. Revenue by Category Graph: Currently this graph is created in Power Point and exported as an image. Use the Power Point template, "[Pie Graph for Sector Report Landing Pages](#)" to create the pie chart. The instructions to update the pie chart are

written in the Power Point template. In an nutshell, select the correct page on the template for your sector report (by color). Edit the data, adjust colors are necessary. Then "select all" and "copy." Then paste onto a 800x800px artboard in Illustrator; adjust the size of the graph, and export as a .png to upload to the website. Please upload a .png with a transparent background that is 800x800px. *(In June/July 2023, Themeco has a planned release that will give the ability to build pie graphs natively within the website. If you would like this portion of the landing page creation to be adjusted, contact Ashley who can build out this small portion. It shouldn't take long.)*

- ii. Revenue by Category Legend: Using the "add row" button, please input each category name and the hex value (including #) of the color associated with that graph in your pie chart. Once completed, please preview on the front end to make sure that you can see all of the colors clearly and adjust as needed.
- o. Pricing table:
 - i. Pricing table intro text: Please enter a keyword rich intro paragraph outlining the high level benefits of downloading this report. This could be adapted from the press release or intro pages of the report. The purpose of this paragraph is primarily for SEO. Character limit - 1000
 - ii. Is this a paid or free report?: Select the correct option and fill in the additional required information if prompted. Note this is used to generate the pricing table section of the landing page and determines which buttons appear in the CTA section at the bottom of the page.
- p. FAQ: Using the "Add FAQ" button, enter a minimum of 3 questions for the FAQ. Note that you can copy and paste options from previous reports, but you will need to adjust the verbiage slightly so as to not be SEO penalised for duplicate content. This section is used for SEO purposes.
 - i. FAQ Question
 - ii. FAQ Answer.
- q. Navigation Menu: the options here control whether or not this landing page appears in the top bar and mega menu navigation throughout the website.
 - i. Include in Navigation Menus: select "yes," when a report is launched and live and this is the landing page that end users should access. Once a new report is launched, you must navigate to the old landing page and change this setting to "no".
- r. New Report Release: This section does not need to be filled in until a new version of this report is scheduled for release. Once this happens, please select the checkbox stating "yes, a new version of this report is scheduled."
 - i. Is a new version of this report scheduled for release?: if so, check yes; and enter the month the new report will be released in the following field.
 - ii. Do you want to include an opt-in form?: if you would like to include an opt-in form on the landing page for end users to register their interest in the Report, please select yes. You will then be prompted to enter the gravity form shortcode for the form. You create the Gravity Form using the below steps, and then input the gravity form ID into the XXXX space.
 - 1. Creating the marketing opt in Gravity Form: Wordpress Dashboard> Forms> search "TEMPLATE: YEAR REPORT NAME Registration of Interest".

1. Duplicate the form.
 2. Update the form name to specify the actual report name
 3. Note the Gravity Form form ID and insert it into the shortcode on the “New Report Release” tab where you are building the landing page.
 4. When the new report is released, be sure that anyone who registered their interest receives the launch email of the updated report.
3. Save Draft
 4. AFTER THE LAUNCH OF THE SECTOR REPORT, and once all of the information is filled in, you can publish your landing page.
 5. **After you publish the landing page**
 - a. **Navigate to the landing page of the old version of the report and do the following:**
 - i. **Under the “navigation menu” tab, toggle the setting to “No, this is an old version of this Report, please do NOT include it in the navigation top bar and mega menu.”**
 - ii. **Change the page status to draft – this is IMPARATIVE for SEO purposes. Having multiple landing pages live for the same report that is targeting the same key word will negatively impact our SEO**
 - iii. **Navigate to the product page of the report and enter the landing page link in to the “Landing Page Link” field. This will cause a headline to appear on the product page that says “See inside the REPORT NAME” so if an potential client needs more information to make a purchase, they can easily navigate to the landing page.**

UPDATING WEBSITE MENU / NAVIGATION BARS

The navigation structure is setup to automatically update based as you create posts.

The menu layout is created in the cornerstone header builder and contains components. You should never need to edit the header in the header builder, and pretty much never need to update the components as they are all automated. If you need to adjust the mega menu, you will do so by: Wordpress Dashboard>Launch Cornerstone> Edit Component “Mega Menu Inner Navigation”. This is a component with a transparent background that gets embedded into an Off Canvas with a coloured background, therefore the text is white and needs to stay white. I recommend using the page outline skeleton structure in the navigation menu to make any edits and if you absolutely have to, add a temporary background color, but don’t forget to remove it. Again, this is all automated, so I can’t foresee any reason this would need to be updated.

The top bar, which lists the secondary reports serves as a quick navigation link for end users, but also to drive on page and structural SEO. The links are automatically generated from the Report Landing Page post type. When you create a new landing page (Wordpress Dashboard> Report Landing Page), there is a tab in the bottom section titled “Navigation Menu.” If this is toggled to Yes, then the Report will appear in the top bar. The title that shows in the top bar is controlled by the “Report Topic” field on this same landing page. It is important to use high ranking SEO keywords in this space.

Once a Report is out of date, you will need to navigate to the landing page and change this toggle to “No” to remove it from the top bar and mega menu.

Report Overview *

Enter the elevator pitch of the Report. This is best adapted from the summarising paragraph of the press release. Be sure to include the key words of the page for SEO purposes. Character limit - 550

NZ's Fintech sector has been one of the fastest growing market sectors in the TIN Report for more than a decade, demonstrated by recent stand-out figures. Its five-year compound annual revenue growth rate is 32%, which is three times the TIN200 five-year average. There were 19 Fintech companies in the TIN200 rankings in 2021 and between them they generated a combined \$1.8 billion in revenue, or 13.1% of the total TIN200 revenue. The sector's growth in 2021 was \$358.7 million; a 25% increase on the previous year.

MIGRATE MEMBERSHIP PAYMENT TO STRIPE

In the past membership payments have been managed by WooCommerce Subscriptions which would use Stripe to charge the customer's credit card annually on the date of their renewal. With the new website build, we need to migrate the membership subscription to Stripe so that Stripe can trigger the renewal payment. To do this:

1. Login to Stripe Dashboard
2. Search the email address used to purchase the membership and open the **Customer**
3. Actions>Create Subscription
 - a. Select the correct membership product
 - b. Click "Add tax manually" > select GST 15%
 - c. Select the correct membership billing start date
 - d. Make sure "automatically charge a payment method on file" is selected
 - e. Double check the Summary, First Invoice amount is correct
 - f. Click Create Subscription

For more information about the emails that are sent out in conjunction with memberships, renewals, and failed payments, see this help document - <https://stripe.com/docs/billing/revenue-recovery/customer-emails> . If you navigate to settings> subscriptions & emails, you'll see the different alerts that are set and can preview the emails.

TINTECH DIRECTORY

CREATING THE MEMBER & SPONSOR LOGOS FOR THE DIRECTORY PROFILE

A few notes for creating the member and sponsor logos:

- Use the [Member Sponsor Logo Template for TINTech Directory Profile](#) template. **This template can be found in Sharepoint>Documents>Membership> Member Logos and Images > Member Sponsor Logo Template for TINTech Directory Profile**. This will ensure that all of the logos are formatted correctly, and also makes it easy to find logos if you need them for another task.
- **In order to use the template, you will need to download it from sharepoint. Then add the new logos to the template. You will then need to upload the new version back to sharepoint and delete the old version.**
- For the white logos, there is a large black box which you can move around so that you can see the white logo is centered. Once it is setup on the artboard correctly, move the black box out of the way so that when you save the image as a transparent .png, it does not save the black background.

ADDING A NEW PROFILE

1. Wordpress Dashboard > TIN Directory > Add New
2. Fill in the required information:
 - a. Enter the business name as this will create the permalink for the directory listing
 - b. Company name: enter the business name
 - c. About: enter the elevator pitch of the company. 1500 characters or less. Press enter to create a new paragraph. If bullet points are needed, copy and paste the bullet point in the "about" instructions.
 - d. Website
 - e. Company logo – full color: using the [Member Sponsor Logo Template for TINTech Directory Profile](#) template, create a save a **.jpg** of the horizontal, full color logo at 1080x400px. Note this logo is used on the member profile page, but also feeds into a lot of other areas on the website, especially for sponsors. This auto populates the logo on the logo ticker tape on the home page, in the footers, on the report pages, etc.
 - f. Company Logo – White with transparent background: using the [Member Sponsor Logo Template for TINTech Directory Profile](#) template, create a save a **.png** of the horizontal, white logo at 1080x400px. Note, if they do not provide a white logo, it is okay, but it will prevent them from being displayed places on the website that utilise a white logo.
 - g. Company logo – square: using the [Member Sponsor Logo Template for TINTech Directory Profile](#) template, create a save a 800x800px, 1:1 ratio, square, version of the company logo on a white background, with a maximum size of 250kb.
 - h. Company Video 1/2/3: please provide the link to a YouTube or Vimeo video showcasing the company and/or their product/service. **At least one company video or product image must be supplied, with a maximum of three videos/images showing on the profile page.**

- i. Product Image 1/2/3: There is not a specified dimension to the product image as companies will provide a wide range of images.
Ensure that the uploaded image(s) is optimised for web and less than 200kb. At least one company video or product image must be supplied, with a maximum of three videos/images showing on the profile page.
- j. Twitter Link: leave blank if not applicable
- k. LinkedIn Link: leave blank if not applicable
- l. Facebook Link: leave blank if not applicable
- m. Instagram Link: leave blank if not applicable
- n. YouTube Link: leave blank if not applicable
- o. Company Type: please select the correct company type as it will auto populate the correct required fields below.
 - i. Tech Company – a tech company who is not ranked in the TIN200, ie, early stage companies, other tech companies. ie. The Insides Company
 - ii. TIN200 – A company ranked in the TIN200 in the TIN Report. ie. Datacom
 - iii. Sponsor – a sponsor who is NOT also a tech or TIN200 company. ie. Absolute IT
 - iv. Affiliate company – an affiliate company member. ie. LATM CAPE
 - v. **Note:** a company may be both a sponsor and a TIN200 or Tech company, in this case, please select TIN200 or Tech company in this field. For example, Fisher and Paykel Healthcare is both a sponsor of the Healthtech Report and a TIN200 company. By selecting TIN200 company, we are able to display more information about them (primary sector, ranking, etc.)
- p. Option fields depending on “company type” selection
 - i. Primary Sector: as listed in the most recent TIN Report
 - ii. Secondary Sector: as listed in the most recent TIN Report
 - iii. Region: as listed in the most recent TIN Report
 - iv. Ownership Structure: as listed in the most recent TIN Report
 - v. **TIN Ranking: Please enter in order from most recent to oldest, the company’s ranking for the past 5 years.** For TIN200 companies, it is IMPARATIVE that you enter their rankings, most recent to oldest, otherwise a portion of their member profile will be blank on the website or will appear in the wrong order. If they have been ranked for less than 5 years, only enter the information for the number of years they have held a ranking. Use the “add row” button to add rows so that you have space to enter each year and the ranking. Note that you can drag and drop the rows by hovering over the row number. [See full instructions in the annual](#)

update section of the website manual.

TIN Ranking

	Year *	TIN 200 Rank *
1	2022 Current year first	17
2	2021	17
3	2020	19
4	2019	20
5	2018	10

 [Add Row](#)

- vi. Current Sponsor: check, "yes this is a current sponsor. Display logo on website footer." If the listing is for a current sponsor and their logo needs to display on the sitewide logo footer.

Company Type *

TIN200 companies are companies that have ranked in the top 200 in the TIN Report for any year since 2018. For any tech company, who has not ranked in the top 200, please select "tech company." For TIN200 companies, it is IMPARATIVE that you enter their rankings in below, otherwise a portion of their member profile will be blank on the website. This field is used to generate the company's profile page.

- ☐ Tech Company
- ☒ TIN200 Company
- ☐ Sponsor
- ☐ Affiliate Company

Current Sponsor

Please check the below ☐ if this company is a current Report sponsor that's logo should be displayed in the website footer.

☐ Yes, this is a current sponsor. Display logo on website footer.

2	2021	1
3	2020	2
4	2019	3
5	2018	3

Add Row

3. Fill in the tags & categories in the side bar. This is incredibly important as it is used to drive other portions of the website.
 - a. TIN Awards: please select all of the awards a member has won. Do NOT type in an award name as it may already be listed in a slightly varied form (different spelling/grammar, etc.). Type in the year of the award and choose from the available options. If you do not see the option you need available, navigate to the TIN Awards category section (Wordpress Dashboard>TIN Directory> TIN Awards). Look for the award here. If you do not see it, enter it here using the correct naming conventions (year first, correct hyphens, capitals, etc.). Then you can navigate back to the TIN Awards section on the profile page, type in the year and your award should be available for selection. . Note, by adding the awards to the category/tag section first, rather than just typing them in on the member profile page, this will ensure that you don't have duplicate awards listed with slight spelling /grammar variations.
 - b. Report Sponsorship: Tag the correct reports that this sponsor is associate with. The easiest way is by typing the year. Note, do NOT add reports here. If you want to create a new report that a sponsor can be attached to, please navigate to the category setup under Wordpress Dashboard> TIN Directory > Report Sponsorship. Double check there isn't already an entry, and if needed add the new report using the correct naming conventions. This will prevent multiple entries for the same report with slight spelling/grammar differences.
 - c. Company Type: please select from the available options: Affiliate Company, Past Sponsor, Sponsor, Tech Company, TIN200. Please do not add new options. This is used to drive other portions of the website.

A LOCAL STORY

We're proud to be 100% New Zealand grown, with a global focus. As a business, we share a common vision of being New Zealand's top technology recruitment company. This means being the best connected, the most knowledgeable and most effective in meeting our clients' and our job seeker's needs—our success comes from your success.

SUPPORTING THE KIWI TECH SECTOR

We have been a passionate contributor to New Zealand's Tech Sector for over 20 years, and we are proud to invest in recurring annual sponsorships. The highlight of our annual partnership with TIN is our sponsorship of the Absolute IT Supreme Scale-Ups award. This accolade celebrates the top ten companies from the

- Save as a draft and review on the front end to make sure that everything is correct. Once it is correct, save as password protected and send the URL and password to the member for final approval before their profile is set live.

REMOVING A PROFILE

When a member does not renew, their profile needs to be removed from the TINTech Directory. I would recommend setting the profile to draft status. (This will save time in the future if they decide to become a member again.) Once the profile is no longer live, a 301 redirect needs to be setup to the main directory page, otherwise SEO will be negatively impacted.
